

alternative transportation fuel (ATF) consumed in the previous calendar year. Form EIA-886 data are collected from suppliers and users of AFVs. EIA uses data from these groups as a basis for estimating total AFV and ATF use in the U.S. These data are needed by Federal and State agencies, fuel suppliers, transit agencies and other fleets to determine if sufficient quantities of AFVs are available for purchase and to provide Congress with a measure of the extent to which the objectives of the Energy Policy Act of 1992 are being achieved. These data serve as market analysis tools for Congress, Federal/State agencies, AFV suppliers, vehicle fleet managers, and other interested organizations and persons. These data are also needed to satisfy numerous public requests for detailed information on AFVs and ATFs (in particular, the number of AFVs distributed by State, as well as the amount and location of the ATFs being consumed).

EIA publishes summary information from the Form EIA-886 database in an annual report on EIA's Web site (www.eia.gov). This report covers historical and projected supplies of AFVs, AFV usage by selected user groups, and estimates of total U.S. AFV counts and U.S. consumption of ATFs. These data provide baseline inputs for DOE's transportation sector energy models. They also provide the energy consumption measures for alternative transportation fuels in EIA's State Energy Data System. For example, EIA's National Energy Modeling System (NEMS) has a component model that forecasts transportation sector energy consumption and provides a framework for AFV policy and technology analysis. The data obtained from Form EIA-886 are used to improve the explanatory power of the NEMS Transportation Demand Model by allowing for greater detail in representing AFV types and characteristics;

(5) *Annual Estimated Number of Total Responses*: 2,050;

(6) *Annual Estimated Number of Burden Hours*: 7,815;

AFV Suppliers (30 Original Equipment Manufacturers): 2.5 hours;

AFV Suppliers (20 Aftermarket Vehicle Converters): 2 hours;

AFV Users (100 complex fleets): 20 hours;

AFV Users (1,900 simple fleets): 3 hours;

(7) *Annual Estimated Reporting and Recordkeeping Cost Burden*: EIA estimates that there are no capital and start-up costs associated with this data collection. The information is maintained in the normal course of business. The cost of burden hours to

the respondents is estimated to be \$562,446 (7,815 burden hours times \$71.97 per hour). Therefore, other than the cost of burden hours, EIA estimates that there are no additional costs for generating, maintaining and providing the information.

Statutory Authority: The legal authority for this data collection effort is provided by the following provisions: Section 13(b) of the Federal Energy Administration Act of 1974, Public Law 93-275, (FEA Act), and codified at 15 U.S.C. 772 (b), and Section 503(b)(2) of the Energy Policy Act of 1992, Public Law 102-486 (EPACT92) codified at 42 U.S.C. 13253.
