

announced in the **Federal Register** of February 27, 2015 (80 FR 10700). The amendment is being made to reflect a change in the *Agenda* portion of the document. There are no other changes.

**FOR FURTHER INFORMATION CONTACT:**

Kristina Toliver, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993-0002, 301-796-9001, FAX: 301-847-8533, [CRDAC@fda.hhs.gov](mailto:CRDAC@fda.hhs.gov), or FDA Advisory Committee Information Line, 1-800-741-8138 (301-443-0572 in the Washington, DC area). Please call the Information Line for up-to-date information on this meeting.

**SUPPLEMENTARY INFORMATION:** In the **Federal Register** of February 27, 2015, FDA announced that a meeting of the Cardiovascular and Renal Drugs Advisory Committee would be held on April 15, 2015. On page 10700, in the first column, the *Agenda* portion of the document is changed to read as follows:

The committee will discuss the new drug application (NDA) 204958, cangrelor injection, submitted by The Medicines Company, for the proposed indication of reduction of thrombotic cardiovascular events in patients with coronary artery disease (CAD) undergoing percutaneous coronary intervention (PCI)—(PCI refers to the opening of narrowed blood vessels supplying the heart muscle by a balloon inserted through an artery puncture with or without a stent) who have not received an oral P2Y12 inhibitor prior to the PCI procedure and in whom oral therapy with P2Y12 inhibitors is not feasible or desirable (P2Y12 is a protein involved in blood clotting. Inhibiting this protein is a key mechanism of action of cangrelor).

This notice is issued under the Federal Advisory Committee Act (5 U.S.C. app. 2) and 21 CFR part 14, relating to the advisory committees.

Dated: March 12, 2015.

**Leslie Kux,**

*Associate Commissioner for Policy.*

[30Day-15-14A10]

**Agency Forms Undergoing Paperwork Reduction Act Review**

The Centers for Disease Control and Prevention (CDC) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The notice for the proposed information collection is published to obtain comments from the public and affected agencies.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address any of the following: (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) Enhance the quality, utility, and clarity of the information to be collected; (d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and (e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639-7570 or send an email to [omb@cdc.gov](mailto:omb@cdc.gov). Written comments and/or suggestions regarding the items contained in this notice should be directed to the Attention: CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395-5806. Written comments should be received within 30 days of this notice.

**Proposed Project**

National Hospital Ambulatory Medical Care Survey (NHAMCS) Supplement of Primary Care Policies for Managing Patients with High Blood Pressure, High Cholesterol, or Diabetes (NSPCP)—New—National Center for

Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

*Background and Brief Description*

Cardiovascular disease is a leading cause of death and disability for men and women in the United States, among the most costly health problems facing our nation today, and among the most preventable. Risk factors for cardiovascular disease include high blood pressure and high cholesterol. Because over 50% of diabetics have high blood pressure, high cholesterol, or both conditions, the optimal systems to treat people with hypertension, high cholesterol, or diabetes are interrelated.

In 2005, CDC's Division for Heart Disease and Stroke Prevention (DHDSP) began developing evaluation indicators that reflect evidence-based outcomes from policy, systems, and environmental changes related to heart disease and stroke prevention. However, many of the indicators for short-term policy and systems changes do not have readily available data sources. This is particularly true for outcomes related to health care systems changes.

NCHS proposes to conduct a new information collection, the NSPCP. The survey will target primary care physicians specializing in internal medicine or family practice. Respondents will be drawn from a nationally representative sample of physicians. Physicians working in hospitals, federal facilities, nursing homes, rehabilitation centers and correctional facilities will not be eligible for the survey. Eligibility will be determined by phone.

The survey instrument will undergo cognitive testing before administration.

The telephone screener will be administered to the individual who answers the phone at the selected practice. We anticipate that this will likely be an office assistant or medical secretary. The primary purpose of the screener is to ensure correct contact information for the physician, so we anticipate that an office assistant or medical secretary will be able to answer the screener questions in a short amount of time. We have estimated 10 minutes per response.

Administrators of the mail-based survey will collect information about physician practices' use of evidence-based systems, including multidisciplinary team approaches for chronic disease treatment, electronic health records (EHR) with features appropriate for treating patients with chronic disease (e.g., clinical decision supports, patient registries), and patient follow-up mechanisms. Approximately 946 physicians will participate in the

information collection. This is a one-time data collection effort.

CDC will use the information to examine health systems and dissemination of health systems technology. Primary care practices will use the results to inform their systems

for managing patients with chronic conditions and to improve the quality of care delivered. NCHS and CDC will also use the results to improve technical assistance to public health partners.

OMB approval is requested for two years. Participation in the survey is

voluntary and all responses CDC will de-identify all responses. There are no costs to respondents other than their time. The total estimated annualized burden hours are 429.

**ESTIMATED ANNUALIZED BURDEN HOURS**

Type of respondent	Form name	Number of respondents	Number responses per respondent	Average burden per response (in hours)
Physician .....	Cognitive Testing Screener .....	25	1	5/60
Physician .....	Cognitive Testing Protocol .....	15	1	1.25
Medical Secretary .....	NSPCP Screener .....	1,500	1	10/60
Physician .....	NSPCP .....	473	1	20/60

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**National Institutes of Health**

**National Institute of Arthritis and Musculoskeletal and Skin Diseases; Notice of Closed Meeting**

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the Board of Scientific Counselors, NIAMS.

The meeting will be closed to the public as indicated below in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S.C., as amended for the review, discussion, and evaluation of individual intramural programs and projects conducted by the National Institute of Arthritis and Musculoskeletal and Skin Diseases, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* Board of Scientific Counselors, NIAMS.

*Date:* April 15-16, 2015.

*Time:* 6:00 p.m. to 3:45 p.m.

*Agenda:* To review and evaluate personal qualifications and performance, and competence of individual investigators.

*Place:* National Institutes of Health, Building 31, Room 4C32, 31 Center Drive, Bethesda, MD 20892.

*Contact Person:* John J. O'Shea, MD, Ph.D., Scientific Director, National Institute of

Arthritis & Musculoskeletal and Skin Diseases, Building 10, Room 9N228, MSC 1820, Bethesda, MD 20892, (301) 496-2612, [osheaj@arb.niams.nih.gov](mailto:osheaj@arb.niams.nih.gov).

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

(Catalogue of Federal Domestic Assistance Program Nos. 93.846, Arthritis, Musculoskeletal and Skin Diseases Research, National Institutes of Health, HHS).

Dated: March 12, 2015.

**Government-Owned Inventions; Availability for Licensing**

**AGENCY:** National Institutes of Health, HHS.

**ACTION:** Notice.

**SUMMARY:** The inventions listed below are owned by an agency of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 209 and 37 CFR part 404 to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

**FOR FURTHER INFORMATION CONTACT:** Licensing information and copies of the U.S. patent applications listed below

may be obtained by writing to the indicated licensing contact at the Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852-3804; telephone: 301-496-7057; fax: 301-402-0220. A signed Confidential Disclosure Agreement will be required to receive copies of the patent applications.

**SUPPLEMENTARY INFORMATION:** Technology descriptions follow.

**GTF2I Mutations as Genetic Marker for Prognosis of Thymic Malignancies**

*Description of Technology:* The present invention describes the presence of a mutation in the general transcription factor Iii (GTF2I) gene in indolent thymic tumors that is rarely found in more aggressive thymic tumors.

The invention provides a method of determining the prognosis of thymic cancer in a patient by assaying (for example using PCR based methods) the genetic material obtained from the patient tissue to detect a mutation in at least one copy of GTF2I genetic sequence; and correlating the presence of a GTF2I mutation with the prognosis of a thymic cancer patient, the presence of the mutation indicating that the thymic cancer is indolent.

A genetic test will complement the diagnostic assessment, facilitate development of a molecular classification and assessment for the clinical management of thymic cancers.

**Potential Commercial Applications:**

- A diagnostic test kit for the prognosis and clinical management of thymic cancer.
- Clinical decision whether treatment is needed (for example, additional treatment after surgery).
- Therapeutic decision making, between an aggressive course of
