

*the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities*, reaffirms Federal agency use of non-governmental standards in procurement.

While Federal purchasing policy is clear for the several standards and ecolabels that are listed in statute, regulation, or Executive Order, the lack of independently assessed information about and Federal guidance on using other product environmental performance standards and ecolabels often results in an inconsistent approach by Federal purchasers and confusion and uncertainty for vendors and manufacturers.

**Burden statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 8.5 hours per response. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

**Respondents/Affected Entities:** Entities potentially affected by this ICR are standards development organizations, ecolabeling programs, and environmental certification entities.

**Estimated total number of potential respondents:** 20.

**Frequency of response:** Once during 2015 pilot; and, a to-be-determined frequency depending upon learnings from the pilot.

**Estimated total average number of responses for each respondent:** 2.

**Estimated total annual burden hours:** 340 hours.

**Estimated total annual costs:** \$24,711.20 for burden hours, and \$0 estimated costs for capital investment or maintenance and operational costs.

**C. What is the next step in the process for this ICR?**

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

**Authority:** 44 U.S.C. 3501 *et seq.*

Dated: March 11, 2015.

## SUPPLEMENTARY INFORMATION:

### I. General Information

**A. Does this action apply to me?**

This action is directed to the public in general. As such, the Agency has not attempted to describe the specific entities that this action may apply to. Although others may be affected, this action applies directly to the submitter of the PMNs addressed in this action.

**B. What should I consider as I prepare my comments for EPA?**

1. **Submitting CBI.** Do not submit this information to EPA through [regulations.gov](http://regulations.gov) or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for preparing your comments.** When preparing and submitting your comments, see the commenting tips at <http://www.epa.gov/dockets/comments.html>.

### II. What action is the agency taking?

This document provides receipt and status reports, which cover the period from January 2, 2015 to January 30, 2015, and consists of the PMNs and TMEs both pending and/or expired, and the NOCs to manufacture a new chemical that the Agency has received under TSCA section 5 during this time period.

### III. What is the agency's authority for taking this action?

Section 5 of TSCA requires that EPA periodically publish in the **Federal**

**Register** receipt and status reports, which cover the following EPA activities required by provisions of TSCA section 5.

EPA classifies a chemical substance as either an “existing” chemical or a “new” chemical. Any chemical substance that is not on EPA’s TSCA Inventory is classified as a “new chemical,” while those that are on the TSCA Inventory are classified as an “existing chemical.” For more information about the TSCA Inventory go to: <http://www.epa.gov/opptintr/newchemicals/pubs/inventory.htm>. Anyone who plans to manufacture or import a new chemical substance for a non-exempt commercial purpose is required by TSCA section 5 to provide EPA with

a PMN, before initiating the activity. Section 5(h)(1) of TSCA authorizes EPA to allow persons, upon application, to manufacture (includes import) or process a new chemical substance, or a chemical substance subject to a significant new use rule (SNUR) issued under TSCA section 5(a), for “test marketing” purposes, which is referred to as a test marketing exemption, or TME. For more information about the requirements applicable to a new chemical go to: <http://www.epa.gov/oppt/newchemicals>.

Under TSCA sections 5(d)(2) and 5(d)(3), EPA is required to publish in the **Federal Register** a notice of receipt of a PMN or an application for a TME and to publish in the **Federal Register**

periodic status reports on the new chemicals under review and the receipt of NOCs to manufacture those chemicals.

**IV. Receipt and Status Reports**
