FR Y-7: Sections 8(a) and 13(a) of the IBA (12 U.S.C. 3106(a) and 3108(a)) and sections 113, 312, 618, and 809 of the Dodd-Frank Act (12 U.S.C. 5361, 5412, 1850a(c)(1), and 5468(b)(1), respectively).

The data collected in the FR Y-6, FR Y-7, FR Y-10, and FR Y-10E are not considered confidential. With regard to information that a banking organization may deem confidential, the institution may request confidential treatment of such information under one or more of the exemptions in the Freedom of Information Act (FOIA) (5 U.S.C. 552). The most likely case for confidential treatment will be based on FOIA exemption 4, which permits an agency to exempt from disclosure "trade secrets and commercial or financial information obtained from a person and privileged and confidential," (5 U.S.C. 552(b)(4)). To the extent an institution can establish the potential for substantial competitive harm, such information would be protected from disclosure under the standards set forth in *National Parks & Conservation Association v. Morton*, 498 F.2d 765 (D.C. Cir. 1974). Exemption 6 of FOIA might also apply with regard to the respondents' submission of non-public personal information of owners, shareholders, directors, officers and employees of respondents. Exemption 6 covers "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy," (5 U.S.C. 552(b)(6)). All requests for confidential treatment would need to be reviewed on a case-by-case basis and in response to a specific request for disclosure.

Abstract: The FR Y-6 is an annual information collection submitted by top-tier HCs and non-qualifying FBOs. It collects financial data, an organization chart, verification of domestic branch data, and information about shareholders. The Federal Reserve uses the data to monitor holding company operations and determine holding company compliance with the provisions of the BHC Act, Regulation Y (12 CFR part 225), the Home Owners'

Loan Act (HOLA), and Regulation LL (12 CFR part 238).

The FR Y-7 is an annual information collection submitted by qualifying FBOs to update their financial and organizational information with the Federal Reserve. The FR Y-7 collects financial, organizational, and managerial information. The Federal Reserve uses information to assess an FBO's ability to be a continuing source of strength to its U.S. operations, and to determine compliance with U.S. laws and regulations.

The FR Y-10 is an event-generated information collection submitted by FBOs; top-tier HCs; security holding companies as authorized under Section 618 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (12 U.S.C. 1850a(c)(1)); state member banks unaffiliated with a BHC; Edge Act and agreement corporations that are not controlled by a member bank, a domestic BHC, or a FBO; and nationally chartered banks that are not controlled by a BHC (with regard to their foreign investments only) to capture changes in their regulated investments and activities. The Federal Reserve uses the data to monitor structure information on subsidiaries and regulated investments of these entities engaged in banking and nonbanking activities. The FR Y-10E is a free-form supplement that may be used to collect additional structural information deemed to be critical and needed in an expedited manner.

Current Actions: The Federal Reserve proposes to collect the Legal Entity Identifier (LEI) for all banking and nonbanking legal entities reportable on the Banking, Non-Banking, SLHC, and 4K schedules (not the Branch schedules) of the FR Y-10 and on the Organization Chart section of the FR Y-6 and FR Y-7. The LEI is a 20-character alphanumeric code that is universal and uniquely corresponds to a single legal entity.¹ The Federal Reserve is only proposing requiring the reporting of an LEI if one has already been issued for the reportable entity at the time of

¹ ISO 17442:2012 defines the term "legal entities" to include, but is not limited to, unique parties that are legally or financially responsible for the performance of financial transactions or have the legal right in their jurisdiction to enter independently into legal contracts, regardless of whether they are incorporated or constituted in some other way (e.g., all financial intermediaries, banks and finance companies, all entities that issue equity, debt or other securities for other capital structures, all entities listed on an exchange, all entities under the purview of a financial regulator and their affiliates, subsidiaries, and holding companies, counterparties to financial transactions). It excludes natural persons, but includes governmental organizations and supranationals.

collection. At this time, the Federal Reserve is not requiring an LEI to be obtained for the sole purpose of reporting the LEI on the FR Y-6, FR Y-7, and FR Y-10.

As evident by the recent financial crisis, it was difficult for regulators to precisely identify parties involved in financial transactions domestically and internationally. At the time, there was no unified global identification system for to link legal entities with different and multiple regulators and jurisdictions. The Board and each financial regulatory agency assigns its' own internal primary identifier to the entities that it regulates, such as the Federal Reserve's Research Statistics Supervision and Discount Identification (*i.e.*, RSSD ID) number, FDIC's Certificate number, and OCC's Charter number.

Several years ago, the Financial Stability Board began leading an international initiative to implement a global identifier system that would uniquely identify parties to financial transactions, and in January 2013, the LEI Regulatory Oversight Committee was established to oversee the Global Legal Entity Identifier System. Domestically, the Financial Stability Oversight Council's Data Committee has encouraged U.S. financial regulators to review and incorporate LEIs in their data collections that would most benefit for purposes of improving financial stability monitoring. As the usage of LEI becomes more prominent, it would enable examiners, economists, and financial analysts to perform improved analyses, particularly during stressed market conditions, and would assist the regulatory community and the financial services industry at large, both domestically and internationally. In addition, it is expected that the use of the LEI among the regulators will expand to facilitate better information sharing and coordination regarding domestic financial policy, rulemaking, examinations, reporting requirements, and enforcement actions. The U.S. Commodity Futures Trading Commission, the U.S. Securities and Exchange Commission, and the National Association of Insurance Commissioners have already incorporated LEI in some of their data collections, and the Consumer Financial Protection Bureau has recently proposed replacing the existing Home Mortgage Disclosure Act (HMDA) Reporter's Identification number in HMDA submissions with LEI.² A uniform, global LEI would assist regulators, supervisors, and public researchers and firms to more effectively

² 79 FR 51731.

measure and monitor systemic risk and counterparty exposure, as well as improve operational efficiencies. A single global system would help support the shared objective of a more stable financial system.

While the Federal Reserve has considered retrieving LEI's from the issuers directly, this method has been deemed as ineffective since the associated structure data is very limited at this time. Reconciling the entity's LEI with their current structure data would be difficult and most likely result in inaccuracies given that so many institutions have similar attributes, such as entity names. Therefore, obtaining the LEI directly from the reporting entity is the most reliable source to accurately match an entity with the correct LEI.

The Federal Reserve proposes to add the LEI to the FR Y-6 and FR Y-7 organizational chart effective with fiscal year ends beginning June 30, 2015. Submission of existing LEI information would follow the normal FR Y-6 and FR Y-7 submission deadlines. The Federal Reserve proposes a one-time information collection to populate existing LEI data for all FR Y-10 reportable entities (excluding branches), as of June 30, 2015. Respondents would submit this information no later than September 30, 2015. LEIs issued after June 30, 2015, should be reported on the appropriate FR Y-10 schedules. For all LEIs assigned between June 30, 2015, and September 30, 2015, information must be received at the appropriate Federal Reserve Bank by October 30, 2015. The Federal Reserve would provide a means for institutions to provide their one-time submission data in a format easier than individual FR Y-10 submissions.

Question: Comments are invited on whether collecting existing LEI information only from entities that are reportable on the FR Y-10 would be sufficient rather than collecting LEI information from all entities reportable on the FR Y-6 and FR Y-7 organizational charts.

Board of Governors of the Federal Reserve System, March 16, 2015.

Robert deV. Frierson,

Secretary of the Board.

SUPPLEMENTARY INFORMATION:

Background

GSA defines Commercial Supplier Agreements as terms and conditions

that are customarily offered to the public by vendors of supplies or services that meet the definition of "commercial item" and are intended to create a binding legal obligation on the end user. Commercial Supplier Agreements are particularly common in information technology acquisitions, including acquisitions of commercial computer software and commercial technical data, but they may apply to any supply or service.

Customarily, commercial item supplies and services are offered to the public under standard agreements that may take a variety of forms, including license agreements, terms of service (TOS), terms of sale or purchase, and similar agreements. These customary, standard Commercial Supplier Agreements typically contain terms and conditions that make sense when the purchaser is a private party but are inappropriate when the purchaser is the Federal Government.

The existence of Federally-incompatible terms in contractors' standard Commercial Supplier Agreements has long been recognized in FAR 27.405-3(b), which is limited to the acquisition of commercial computer software. This clause advises contracting officers to exercise caution when accepting a contractor's terms and conditions. However, the use of Commercial Supplier Agreements is not limited to information technology acquisitions; Commercial Supplier Agreements have become ubiquitous in a broad variety of contexts, from travel to telecommunications to financial services to building maintenance systems, including purchases below the simplified acquisition threshold.

Discrepancies between Commercial Supplier Agreements and Federal law or the Government's needs create recurrent points of inconsistency. Below are several examples of incompatible clauses that are commonly found in Commercial Supplier Agreements:

- *Jurisdiction or venue clauses* may require that disputes be resolved in a particular state or Federal court. Such clauses conflict with the sovereign immunity of the US Government and cannot apply to litigation where the US Government is a defendant because those disputes must be heard either in US District Court (28 U.S.C. 1346) or the US Court of Federal Claims (28 U.S.C. 1491).

- *Automatic renewal clauses* may automatically renew or extend contracts unless affirmative action is taken by the Government. Such clauses that require the obligation of funds prior to appropriation violate the restrictions of
