SUPPLEMENTARY INFORMATION:

I. Abstract

The Land Remote Sensing Education, Outreach and Research Activity (NLRSEORA) is an effort that involves the development of a U.S. National consortium in building the capability to receive, process and archive remotely sensed data for the purpose of providing access to university and State organizations in a ready-to-use format; and to expand the science of remote sensing through education, research/ applications development and outreach in areas such as environmental monitoring, climate change research,

Respondents are submitting proposals to acquire funding for a National (U.S.) program to promote the uses of space-based land remote sensing data and technologies through education and outreach at the State and local level and through university-based and collaborative research projects. This notice concerns the collection of information that is sufficient and relevant to evaluate and select proposals for funding.
