

property including normal, routine land management activities, and incidental to return to baseline conditions if desired. Although take of listed plant species is not prohibited under the Act, and therefore cannot be authorized under an enhancement of survival permit, plant species may be included on a permit in recognition of the net conservation benefit provided to them under a safe harbor agreement. An applicant would receive assurances under our “No Surprises” regulations (50 CFR 17.22(c)(5) and 17.32(c)(5)) for all species included in the Enhancement of Survival permit. In addition to meeting other criteria, actions to be performed under an Enhancement of Survival permit must not jeopardize the existence of federally listed fish, wildlife, or plants.
