Abstract: The Office for Civil Rights (OCR) has enforcement responsibilities under several civil rights laws, including Title VI, Title IX, Section 504, the Age Discrimination Act, and the Boy Scouts of America Equal Access Act. To meet these responsibilities, OCR collects assurances of compliance from applicants for Federal financial assistance from, and applicants for funds made available through, the Department of Education, as required by regulations. These entities include, for example, State educational agencies, local education agencies, and postsecondary educational institutions. If a recipient violates one or more of these civil rights laws, OCR and the Department of Justice can use the signed assurances of compliance in an enforcement proceeding.

Title of Collection: What Works Clearinghouse Formative Feedback.

OMB Control Number: 1850-0788.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 84,630.

Total Estimated Number of Annual Burden Hours: 1,729.

Abstract: The Institute of Education Sciences (IES) within the U.S. Department of Education is proposing data collection activity as part of the What Works Clearinghouse Feedback Task. The task and its associated efforts are being undertaken by the U.S. Department of Education, Institute of Education Sciences (IES), and are being conducted by Mathematica Policy Research. The intended purpose of the Department of Education (ED), Institute of Education Sciences (IES) WWC

feedback task is to collect feedback from users on the relevance, timeliness, quality, and ease of use of the products associated with the What Works Clearinghouse Web site. The results of the data collection will be used to inform improvements in ED program products and services for its customers. The WWC provides educators, policymakers, and the public with a central and trusted source of scientific evidence of what works in education. The WWC aims to make findings from education research easy and accessible through its searchable online repository of intervention reports, single study reviews, and practice guides. There are thousands of empirical studies that claim to identify effective instructional approaches, many using complicated research methods and statistical analyses. This research often yields conflicting results, leaving educators wondering which approach to take. Given the large volume of education research and significant variations in quality, principals and other educators need help identifying reliable research and interpreting findings. Using systematic review processes and evidence standards, the WWC reviews all the research on a topic to identify the most rigorous studies and synthesize the findings from high-quality education research. The WWC has developed three new products that focus on utilizing the WWC and the WWC resources when making key decisions in education. First, the WWC will produce and is developing several videos that describe the purpose of the WWC or how to understand specific materials on the Web site. For example, the WWC has already released a video that addresses how to select a mathematics curriculum. The WWC also developed practice guide summaries which consolidate the information from practice guides into an 8-10 page summary that presents expert recommendations from the field, along with tips on implementing the recommendations. The WWC has already released two of these summaries—Teaching Math to Young Children and Teaching Elementary School Students to Be Effective Writers. Finally, topical blasts consolidate WWC content relevant to a specific education topic. Emails direct users to a dedicated landing page containing links to the relevant content. Findings from the case studies of these topics will be used to improve these and other WWC products going forward. The WWC feedback task will include the following data collection methods: Focus groups with WWC users, user feedback Web surveys, and data analytics.
