Commission records indicate that the project has not operated since the project penstock ruptured in 1994. After several years of correspondence regarding restoring project operation, the licensee has become non-responsive. The licensee most recently filed a plan and schedule to restore project operation with the Commission on February 6, 2014. By letter dated March 6, 2014, the Commission acknowledged the filing and required the licensee to file progress reports January 1 and June 1 of each year to ensure the licensee's continued progress towards restoring project operation. The licensee did not file the first progress report due on June 1, 2014. By letter dated November 12, 2014, the Commission indicated the licensee must file the overdue progress report, failure to do so would result in an implied surrender of the project license. To date, the licensee has not filed a response and the project remains inoperable.
