

its statutory obligation to serve as a national clearinghouse for civil rights information.

Each advisory committee consists of not more than 19 members, each of whom will serve a four-year term. Members serve as unpaid Special Government Employees who are reimbursed for travel and expenses. To be eligible to be on an advisory committee, applicants must be residents of the respective state or district, and have demonstrated expertise or interest in civil rights issues.

The Commission is an independent, bipartisan agency established by Congress in 1957 to focus on matters of race, color, religion, sex, age, disability, or national origin. Its mandate is to:

- Investigate complaints from citizens that their voting rights are being deprived,
- study and collect information about discrimination or denials of equal protection under the law,
- appraise federal civil rights laws and policies,
- serve as a national clearinghouse on discrimination laws,
- submit reports and findings and recommendations to the President and the Congress, and
- issue public service announcements to discourage discrimination.

The Commission invites any individual who is eligible to be appointed a member of the Tennessee, Maine, Rhode Island, or West Virginia Advisory Committee covered by this notice to send a letter of interest and a resume to the respective address above.

SUPPLEMENTARY INFORMATION:

I. Abstract

The mission of the Geography Division (GEO) within the Census Bureau is to plan, coordinate, and administer all geographic and cartographic activities needed to facilitate Census Bureau statistical programs throughout the United States and its territories. GEO manages programs that continuously update features, boundaries, addresses, and geographic entities in the Master Address File/Topologically Integrated Geographic Encoding and Referencing (MAF/TIGER) System. GEO, also, conducts research into geographic concepts, methods, and standards needed to facilitate Census Bureau data collection and dissemination programs.

The Census Bureau is requesting a revision of a currently approved collection, to cover the annotation and verification phases of the 2015-2016 School District Review Program (SDRP). The Census Bureau requests a two-year clearance and a project specific Office of Management and Budget (OMB) Control Number for SDRP. GEO, in coordination with OMB, is removing select programs from the generic Geographic Partnership Programs (GPPs) clearance to individual project specific clearance packages. A project specific clearance for SDRP will allow the Census Bureau to provide enhanced detail and ensure the two-year cycle is uninterrupted.

The National Center for Education Statistics (NCES) sponsors the SDRP, which enables the Census Bureau to create special tabulations of Decennial Census data by school district geography. The demographic data produced by the Census Bureau for the NCES and related to each school district is of vital importance for each state's

allocation under Title I of the Elementary and Secondary Education Act as amended by the No Child Left Behind Act of 2001. The NCES identifies a Title I Coordinator, and the Census Bureau works with the NCES on assigning a Mapping Coordinator in each state to work with the Census Bureau to implement this work. The respondents for the SDRP are the Title I Coordinators and Mapping Coordinators from the fifty states and the District of Columbia.

II. Method of Collection

The SDRP invites respondent participation in two phases of the program: Annotation and Verification. As part of the 2015-2016 SDRP Annotation phase, the Mapping Coordinator in each state will receive a variety of materials from the Census Bureau to use in their review and update of school district boundaries, names, codes and geographic relationships. The Mapping Coordinators will use the Census Bureau's MAF/TIGER Partnership Software (MTPS) and Census supplied spatial data in digital shapefile format to identify boundary changes for their school districts. As part of the Verification phase of the SDRP, Mapping Coordinators will have the opportunity to either use the MTPS with Census Bureau supplied Verification shapefiles, or the Census Crowdourcing Tool (CCT) to review and verify that their submitted information was correctly captured by the Census Bureau. If a respondent finds cases where the Census Bureau did not incorporate their proposed submissions correctly, the respondent can tag and comment the area of issue and that information will become available to the Census Bureau for corrections.

The Census Bureau conducts the SDRP every two years under agreement from the NCES of the U.S. Department of Education (ED). The Census Bureau invites state education officials to participate in the review and update of its national inventory of school district boundaries and district information. State education officials collaborate with local superintendents on their responses. The participants review and provide updates and corrections to the elementary, secondary, and unified school district names and Federal Local Education Agency (LEA) identification numbers, school district boundaries, and the grade ranges for which a school district is financially responsible. The participants submit updated digital spatial files back to the Census Bureau.

The Census Bureau uses the updated school district information along with

the most current Census population and income data, current population estimates, and tabulations of administrative records data, to form the Census Bureau's estimates of the number of children aged five through seventeen in low-income families for each school district. These estimates of the number of children in low-income families residing within each school district are the basis of the funding allocation for each school district under Title I of the Elementary and Secondary Education Act as amended by the No Child Left Behind Act of 2001, Public Law (Pub.L.) 107-110.
