National Agricultural Statistics Service

Title: Agricultural Resource Management, Chemical Use, and Post-harvest Chemical Use Surveys.

OMB Control Number: 0535-0218.

Summary of Collection: The primary objectives of the National Agricultural Statistics Service (NASS) are to provide the public with timely and reliable agricultural production and economic statistics, as well as environmental and specialty agricultural related statistics. The surveys—the Agricultural Resource Management Study (ARMS), the Vegetable Chemical Use Surveys, the Fruit Chemical Use Surveys, and the new Microbial Food Safety Practices—Packer Survey—are critical to NASS' ability to fulfill these objectives and to build the congressionally mandated database on agricultural chemical use and related farm practices. NASS uses a variety of survey instruments to collect the information in conjunction with these studies.

Need and Use of the Information: The ARMS provides a robust data base of information to address varied needs of policy makers. There are many uses for the information from this study including an evaluation of the safety of the nation's food supply; input to the farm sector portion of the gross domestic product; and to provide a barometer on the financial condition of farm businesses. ARMS is the only annual source of whole farm information available for objective evaluation of many critical issues related to agriculture and the rural economy, such as: whole farm finance data, marketing information, input usage, production practices, and crop substitution possibilities. Without these data, decision makers cannot analyze and report on critical issues that affect farms and farm households when pesticide regulatory actions are being considered.

Description of Respondents: Farms.

Number of Respondents: 91,916.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 91,208.

Departmental Information Collection Clearance Officer.

Background

The NACMCF was established in 1988 in response to a recommendation of the National Academy of Sciences for an interagency approach to microbiological criteria for foods and in response to a recommendation of the U.S. House of Representatives Committee on Appropriations, as expressed in the Rural Development, Agriculture, and Related Agencies Appropriation Bill for fiscal year 1988. The Committee also provides scientific advice and recommendations to the Food and Drug Administration, the Centers for Disease Control and Prevention, and the Departments of Commerce and Defense.

Mr. Brian Ronholm, Deputy Under Secretary for Food Safety, USDA, is the Committee Chair; Dr. Susan T. Mayne, Director of the Food and Drug Administration's Center for Food Safety and Applied Nutrition (CFSAN), is the Vice-Chair; and Dr. James Rogers, FSIS, is the Executive Secretary.
