## DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS–2015–0017]

### Notice of Request for Public Comment Regarding Information Sharing and Analysis Organizations

**AGENCY:** Office of Cybersecurity and Communications, National Protection and Programs Directorate, Department of Homeland Security.

**ACTION:** Request for Public Comment.

**SUMMARY:** This Notice announces a public comment period to allow input

from the public on the formation of Information Sharing and Analysis Organizations (ISAOs) for cybersecurity information sharing, as directed by Executive Order 13691. DHS is soliciting public comments and questions from all citizens and organizations related to the provisions of E.O. 13691 “Promoting Private Sector Cybersecurity Information Sharing” of February 13, 2015. The purpose of this request for comment is to gather public input and considerations related to DHS’ public engagements and implementation of E.O. 13691 including the selection of a “standards organizations” and approved activities of the selected standards organization.

**DATES:** The comment period will be held until July 10, 2015. See

**SUPPLEMENTARY INFORMATION** section for the address to submit written or electronic comments.

#### Specific Comments Sought

Individuals and organizations providing comment to this DHS request are requested to address the following questions during this open comment period. However, all comments related to E.O. 13691 will be accepted. As such, submitted comments are not required to address the following five questions to receive due consideration by the Government. At the conclusion of this comment period a DHS will compile and address these comments to the extent practicable in a document which will be made broadly available and may result in further dialog via this forum or other means.

1. Describe the overarching goal and value proposition of Information Sharing and Analysis Organizations (ISAOs) for your organization.

2. Identify and describe any information protection policies that should be implemented by ISAOs to ensure that they maintain the trust of participating organizations.

3. Describe any capabilities that should be demonstrated by ISAOs, including capabilities related to receiving, analyzing, storing, and sharing information.

4. Describe any potential attributes of ISAOs that will constrain their capability to best serve the information sharing requirements of member organizations.

5. Identify and comment on proven methods and models that can be emulated to assist in promoting formation of ISAOs and how the ISAO “standards” body called for by E.O. 13691 can leverage such methods and models in developing its guidance.

6. How can the U.S. government best foster and encourage the organic

development of ISAOs, and what should the U.S. government avoid when interacting with or supporting ISAOs?

7. Identify potential conflicts with existing laws, authorities that may inhibit organizations from participating in ISAOs and describe potential remedies to these conflicts.

8. Please identify other potential challenges and issues that you believe may affect the development and maturation of effective ISAOs.

**SUPPLEMENTARY INFORMATION:** Executive Order 13691 can be found at: <https://www.whitehouse.gov/the-press-office/2015/02/13/executive-order-promoting-private-sector-cybersecurity-information-shari>.

#### Background and Purpose

On February 13, 2015, President Obama signed Executive Order 13691 intended to enable and facilitate “private companies, nonprofit organizations, and executive departments and agencies . . . to share information related to cybersecurity risks and incidents and collaborate to respond in as close to real time as possible.” The order addresses two concerns the private sector has raised:

- How can companies share information if they do not fit neatly into the sector-based structure of the existing Information Sharing and Analysis Centers (ISACs)?
- If a group of companies wants to start an information sharing organization, what model should they follow? What are the best practices for such an organization?

ISAOs may allow organizations to robustly participate in DHS information sharing programs even if they do not fit into an existing critical infrastructure sector, seek to collaborate with other companies in different ways (regionally, for example), or lack sufficient resources to share directly with the government. ISAOs may participate in existing DHS cybersecurity information sharing programs and contribute to near-real-time sharing of cyber threat indicators.

#### Submitting Written Comments

You may also submit written comments to the docket using any one of the following methods:

(1) *Federal eRulemaking Portal:* <http://www.regulations.gov>. Although comments are being submitted to the Federal eRulemaking Portal, this is a tool to provide transparency to the general public, not because this is a rulemaking action.

(2) *Email:* [ISAO@hq.dhs.gov](mailto:ISAO@hq.dhs.gov). Include the docket number in the subject line of the message.
