

information submitted by Southern. The Common Metrics Report of concern to Southern was intended to evaluate whether the common metrics are measuring the same activities and have the same meaning across the industry.¹⁴ Accordingly, the purpose of the report was not intended to be the primary data source. Nor did the mentioned errors and misstatements,¹⁵ have any impact on the common metrics evaluation.

As for the statement in the Common Metrics Report regarding a utility's incentive to discriminate among users of transmission services, this statement has no bearing on the usefulness or quality of the information collected. Southern's and EEI's comments on the potential use of data in enforcement proceedings are also beyond the scope of this data collection notice and are not reflective of the intention of this data collection which is to measure the performance of reliability and operations functions in which ISOs and RTOs and public utilities outside ISO and RTO markets perform identical activities.

Additional Data Collection

APPA, AWEA, and ITC recommend that additional data be collected and reported in order to further improve the usefulness of the performance metrics. ITC does not consider information on transmission facilities approved for construction for reliability purposes to be meaningful without proper context. Southern and EEI state that the proposed common wholesale price metric for ISOs and RTOs and utilities in non-ISO/RTO regions¹⁶ would not provide relevant or useful information since ISO and RTO markets differ significantly from the bilateral markets in non-ISO/RTO regions.

FERC Response: Commission Staff will discuss additional data collection and metrics of interest to commenters, as well as ways to make the metrics more meaningful, in the ongoing voluntary and collaborative process with ISOs, RTOs, participating utilities in non-ISO/RTO regions, and stakeholders.
