This proceeding arises from the Commission's May 21, 2015 decision in CLI-15-14, which refers to the Atomic Safety and Licensing Board Panel a

limited portion of a hearing request submitted by Friends of the Earth (FoE) "to determine whether [FoE] has identified an NRC activity [involving the operating licenses held by Pacific Gas & Electric Company (PG&E) for Diablo Canyon Power Plant Units 1 and 2] that requires an opportunity to request an adjudicatory hearing pursuant to section 189a. of the Atomic Energy Act of 1954, as amended (AEA)." Slip op. at 2; *see also id.* at 7 ("The scope of the referral is limited to whether the NRC granted PG&E greater authority than that provided by its existing licenses or otherwise altered the terms of PG&E's existing licenses, thereby entitling [FoE] to an opportunity to request a hearing pursuant to AEA section 189a."). The Commission's referral "includes such threshold issues as standing, timeliness, and satisfaction of admissibility standards" (*id.* at 8), and the Commission directed the Board "to rule on whether [FoE's] hearing request should be granted within 140 days of the date of this decision." *Id.* at 8-9.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-391; NRC-2015-0127]

Tennessee Valley Authority; Watts Bar Nuclear Plant, Unit 1

AGENCY: Nuclear Regulatory Commission.

ACTION: License amendment request; opportunity to comment, request a hearing, and petition for leave to intervene; order.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an amendment to Facility Operating License No. NPF-90, issued to the Tennessee Valley Authority (TVA), for operation of the Watts Bar Nuclear Plant (WBN), Unit 1. The amendment request would revise the approved Cyber Security Plan for the WBN site, and clarify the demarcation point (so called Bright-Line) between digital components under NRC jurisdiction, and those under the jurisdiction of the Federal Energy Regulatory Commission (FERC). Specifically, certain equipment located within the WBN, but owned by the Transmission and Power Supply business unit, will be classified either as NRC-regulated or FERC-regulated. This demarcation will allow both the NRC and licensee to use the correct process for information associated with the specific equipment. For this amendment request, the NRC proposes to determine that it involves no significant hazards consideration. In addition, the amendment request contains sensitive unclassified non-safeguards information (SUNSI).

DATES: Submit comments by July 1, 2015. Requests for a hearing or petition for leave to intervene must be filed by July 31, 2015. Any potential party as defined in § 2.4 of Title 10 of the *Code of Federal Regulations* (10 CFR), who believes access to SUNSI is necessary to respond to this notice must request document access by June 11, 2015.
