Forest Service

Title: Grazing Permit Administration Forms.

OMB Control Number: 0596-0003.

Summary of Collection: Domestic livestock grazing occurs on approximately 92 million acres of National Forest Service (NFS) lands. This grazing is subject to authorization and administrative oversight by the Forest Service (FS). The information is required for the issuance and administration of grazing permits, including fee collections, on NFS land as authorized by the Federal Land Policy and Management Act 1976, as amended, and subsequent Secretary of Agriculture Regulation 5 U.S.C. 301, 36 CFR 222, subparts A and C. The bills for collection of grazing fees are based on the number of domestic livestock grazed on national forest lands and are a direct result of issuance of the grazing permit. Information must be collected on an individual basis and is collected through the permit issuance and administration process. FS will collect information using several forms.

Need and Use of the Information: FS will collect information on the ownership or control of livestock and base ranch property and the need for additional grazing to round out year long ranching operations. FS uses the information collected in administering the grazing use program on NFS land. If information were not collected it would be impossible for the agency to administer a grazing use program in accordance with the statutes and regulations.

SUPPLEMENTARY INFORMATION:

Title: Stocks Reports.

OMB Control Number: 0535-0007.

Expiration Date of Approval: January 31, 2016.

Type of Request: Intent to Seek Approval to Revise and Extend an Information Collection for 3 years.

Abstract: The primary objective of the National Agricultural Statistics Service is to prepare and issue State and national estimates of crop and livestock production, stocks, disposition, and prices

The *Stocks Report* surveys provide estimates of stocks of grains, hops, oilseeds, peanuts, potatoes, and rice that are stored off-farm. These off-farm stocks are combined with on-farm stocks to estimate stocks in all positions. The grain *Stocks Reports* are a principle economic indicator as defined by OMB. Stocks statistics are used by the U.S. Department of Agriculture to help administer programs; by State agencies to develop, research, and promote the marketing of products; and by producers and buyers to find their best market opportunity(s). The *Stocks Reports* are instrumental in providing timely, accurate data to help grain market participants. Since the previous approval, NASS has made several changes that have resulted in a significant reduction in number of respondents contacted and the overall respondent burden. The potato stocks survey was changed from a monthly survey to a quarterly survey. The potato price survey has been dropped from this renewal. The sample size for the off-farm grain and oilseed operations has been decreased by approximately 500 operations (quarterly), due to mergers of some operations and improved sampling of operations by NASS.

The current expiration date for this docket is January 31, 2016. NASS intends to request that the survey be approved for another 3 years.

Authority: These data will be collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985 as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3501, *et seq.*), and Office of Management and Budget regulations at 5 CFR part 1320.

NASS also complies with OMB Implementation Guidance, "Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA)," **Federal Register**, Vol. 72, No. 115, June 15, 2007, p. 33362.

Estimate of Burden: This information collection comprises 11 individual surveys that are conducted either 1, 4, 5, or 12 times a year for an estimated total of 23,000 responses. Average reporting burden for this collection of information ranges from 10 to 25 minutes per response.

Respondents: Farms and businesses.
Estimated Number of Respondents: 6,700.

Estimated Total Annual Burden on Respondents: 6,500 hours.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, through the use of appropriate automated, electronic, mechanical, technological, or other forms of information technology collection methods.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, May 26, 2015.
