

implemented under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (MSA), 16 U.S.C. 1801, *et seq.*, by regulations at 50 CFR part 660.

Background

A final rule to add regulations at 50 CFR part 660, subpart K, to require use of a NMFS-approved VMS and to institute a 48-hour pre-trip call-in notification requirement for DGN vessel owners and operators, was published in the **Federal Register** on February 26, 2015 (80 FR 10392). The requirements of that final rule, other than the collection-of-information requirements associated with VMS requirements, were effective on March 30, 2015. Because OMB approval of the collection-of-information requirements had not been received by the date that the final rule was published, the effective date of the VMS requirements was delayed.

OMB approved the collection-of-information requirements contained in the final rule on May 5, 2015. Accordingly, this final rule makes effective the collection-of-information requirements at § 660.705 and § 660.713, which were amended in the February 26, 2015, final rule.

Classification

This final rule has been determined to be not significant for purposes of Executive Order 12866.

This final rule contains a collection-of-information requirements subject to the Paperwork Reduction Act (PRA) under OMB Control Number 0648-0498. The public reporting burden for compliance with the these requirements is estimated to include a one-time, 4-hour response time for installing a VMS unit and a 1-hour response time annually to maintain and repair a unit. Activation and exemption reports are estimated to average 5 minutes per response, including time to review instructions for, and prepare and submit the reports.

Notwithstanding any other provision of the law, no person is required to respond to, and no person shall be subject to penalty for failure to comply with, a collection-of-information subject to the requirements of the PRA, unless that collection-of-information displays a currently valid OMB control number.

The Coast Guard will also inform the users of the waterway through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessels can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.
