The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on June 1, 2015.

The Saft facility is located within Site 10 of FTZ 64. The facility is used for the warehousing, production and distribution of lithium-ion batteries. battery covers and jelly rolls; battery terminals; and, battery components (duty rate 3.4%) for the foreign status inputs noted below. Customs duties also could possibly be deferred or reduced on foreign status production equipment.

The components and materials sourced from abroad include: Natural graphite powder; lithium nickel cobalt; plastic casing; PVC sleeves; stand wire cables for batteries; wire fitted parts; aluminum can stocks; aluminum cans; storage battery modules; lithium-ion batteries and internal components; connecting cables; board panels; electrical circuits; copper cables; ocean-ready containers; and, battery test systems (duty rate ranges from duty-free to 5.8%).
