Determination of Overfishing or an Overfished Condition

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: This action serves as a notice that NMFS, on behalf of the Secretary of Commerce (Secretary), has found that the following stocks are subject to overfishing or are in an overfished condition: Gulf of Maine/Northern Georges Bank red hake, which is managed by the New England Fishery Management Council, is now subject to overfishing, but is not overfished; and Southeast Florida hogfish, which is jointly managed by the Gulf of Mexico and South Atlantic Fishery Management Councils, is now subject to overfishing and is in an overfished condition. NMFS, on behalf of the Secretary, notifies the appropriate fishery management council (Council) whenever it determines that overfishing is occurring, a stock is in an overfished condition, a stock is approaching an overfished condition, or when a rebuilding plan has not resulted in adequate progress toward ending overfishing and rebuilding affected fish stocks.

FOR FURTHER INFORMATION CONTACT: Regina Spallone, (301) 427-8568.

SUPPLEMENTARY INFORMATION: Pursuant to sections 304(e)(2) and (e)(7) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1854(e)(2) and (e)(7), and implementing regulations at 50 CFR 600.310(e)(2), NMFS, on behalf of the Secretary, must notify Councils whenever it determines that a stock or stock complex is overfished or approaching an overfished

condition; or if an existing rebuilding plan has not ended overfishing or resulted in adequate rebuilding progress. NMFS also notifies Councils when it determines a stock or stock complex is subject to overfishing. Section 304(e)(2) further requires NMFS to publish these notices in the **Federal Register**.

NMFS has determined that the Gulf of Maine/Northern Georges Bank stock of red hake is now subject to overfishing. The New England Fishery Management Council has been informed that they must end overfishing on this stock.

NMFS has determined that the Southeast Florida stock of hogfish is now subject to overfishing and in an overfished condition. The Southeast Florida stock of hogfish was recently identified as a separate stock among a total of three hogfish stocks. The Gulf of Mexico Fishery Management Council and the South Atlantic Fishery Management Council have been informed that they must end overfishing and rebuild the Southeast Florida stock of hogfish.

Dated: June 9, 2015.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Fisheries of the South Atlantic; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 41 pre Data Workshop II webinar.

SUMMARY: The SEDAR 41 assessments of the South Atlantic stocks of red snapper and gray triggerfish will consist of a series of workshops and webinars: Data Workshops; an Assessment Process; and a Review Workshop. This notice is for a webinar associated with the Data portion of the SEDAR process. See **SUPPLEMENTARY INFORMATION**.

DATES: A SEDAR 41 pre Data Workshop II webinar will be held on Wednesday, July 1, 2015, from 9 a.m. until 12 p.m. The established times may be adjusted as necessary to accommodate the timely completion of discussion relevant to the

assessment process. Such adjustments may result in the meeting being extended from, or completed prior to the time established by this notice.

ADDRESSES:

Meeting address: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julia Byrd at SEDAR (see **FOR FURTHER INFORMATION CONTACT** below) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SEDAR address: 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julia Byrd, SEDAR Coordinator; phone: (843) 571-4366; email: julia.byrd@safmc.net.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop(s); (2) Assessment Process; and (3) Review Workshop. The product of the Data Workshop(s) is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants include: Data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of
