

2016. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR renewal will allow EPA to collect necessary data to evaluate an application of a pesticide product as required under section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), and the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act (FQPA) of August 3, 1996. Under FIFRA, EPA must evaluate pesticides thoroughly before they can be marketed and used in the United States, to ensure that they will not pose unreasonable adverse effects to human health and the environment. Pesticides that meet this test are granted a license or "registration" which permits their distribution, sale and use according to requirements set by EPA to protect human health and the environment.

The producer of the pesticide must provide data from tests done according to EPA guidelines or other test methods that provide acceptable data. These tests must determine whether a pesticide has the potential to cause adverse effects on humans, wildlife, fish and plants, including endangered species and non-target organisms, as well as possible contamination of surface water or groundwater from leaching, runoff and spray drift. EPA also must approve the language that appears on each pesticide label. A pesticide product can only be used according to the directions on the labeling accompanying it at the time of sale, through its use and disposal. Responses to the collection of information are mandatory (see 40 CFR 152).

Respondents may claim all or part of a notice as CBI. EPA will disclose information that is covered by a CBI claim only to the extent permitted by, and in accordance with, the procedures in 40 CFR part 2.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to range from 14 hours to 646 hours per response for registration

application activities, and from 520 hours to 45,000 hours per response for activities associated with data generation. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/Affected Entities: Entities potentially affected by this ICR are individuals or entities engaged in activities related to the registration of pesticide products.

Estimated total number of potential respondents: 1,751.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 1,524,893 hours.

Estimated total annual costs: \$108,720,767. This includes an estimated burden cost of \$12,471,401 for the pesticide application process, \$96,249,367 for data generation, and no cost for capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

Overall, there is a difference of 1,356,689 hours in the total estimated respondent burden compared with that identified in the current ICR approved by OMB. This change reflects EPA's updating of the methodology used to estimate the paperwork burden, and including a previously unaccounted for burden for study data generation. However, there is a decrease of approximately 23,000 hours in the total estimated respondent burden for the registration application process compared with that identified in the ICR currently approved by OMB. This decrease reflects EPA's receipt of fewer number of applications. This change is an adjustment.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.
