Form Number(s): None.

Type of Request: Regular (revision and extension of a currently approved information collection).

Number of Respondents: 1.

Average Hours per Response: 3.

Burden Hours: 3.

Needs and Uses: This request is for revision and extension of a currently approved information collection.

The National Marine Fisheries Service (NMFS) requires pelagic longline vessel operators to notify NMFS in the event an endangered short-tailed albatross is hooked or entangled during fishing operations. Following the retrieval of the seabird from the ocean, as required by Federal regulations, the vessel captain must record the condition of the injured short-tailed albatross on a recovery data form. A veterinarian will use the information in providing advice to the captain caring for the short-tailed albatross. If the albatross is dead, the captain must attach an identification tag to the carcass to assist the U.S. Fish and Wildlife Service (USFWS) biologists in follow-up studies on the specimen. This collection is one of the terms and conditions contained in the biological opinion issued by USFWS, and is intended to maximize the probability of the long-term survival of short-tailed albatross accidentally taken by longline gear.

The form has been modified based on public comment.

Fishermen in Federally-managed fisheries in the western Pacific region are required to provide certain information about their fishing activities, catch, and interactions with protected species by submitting reports to National Marine Fisheries Service (NMFS), per 50 CFR part 665. These data are needed to determine the condition of the stocks and whether the current management measures are having the intended effects, to evaluate the benefits and costs of changes in management measures, and to monitor and respond to accidental takes of endangered and threatened species, including seabirds, sea turtles, and marine mammals.

We are removing one form that has been added to another information collection, and moving two from other information collections to this one.

Affected Public: Business and other for-profit organizations; individuals or households.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in

response to this notice will be considered public records.

Title of Collection: Middle Grades Longitudinal Study of 2016–2017 (MGLS:2017) Item Validation and Operational Field Tests.

OMB Control Number: 1850–0911.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: Individuals.

Total Estimated Number of Annual Responses: 25,951.

Total Estimated Number of Annual Burden Hours: 8,729.

Abstract: The Middle Grades Longitudinal Study of 2016–2017 (MGLS:2017) is the first study sponsored by the National Center for Education Statistics (NCES), within the Institute of Education Sciences (IES) of the U.S. Department of Education (ED), to follow a nationally-representative sample of students as they enter and move through the middle grades (grades 6–8). The data collected through repeated measures of key constructs will provide a rich descriptive picture of the academic experiences and development of students during these critical years and will allow researchers to examine associations between contextual factors and student outcomes. The study will focus on student achievement in mathematics and literacy along with measures of student socioemotional wellbeing and other outcomes. The study will also include a special sample of students with different types of disabilities that will provide descriptive information on their outcomes, educational experiences, and special education services. Baseline data for the MGLS:2017 will be collected from a nationally-representative sample of 6th grade students in winter of 2017 with annual follow-ups in winter 2018 and winter 2019 when most of the students in the sample will be in grades 7 and 8, respectively. This request is to concurrently conduct the Item Validation and the Operational Field Tests for the MGLS: 2017, beginning in January 2016. The primary purpose of the Item Validation Field Test is to determine the psychometric properties of items and the predictive potential of assessment and survey items so that valid, reliable, and useful assessment and survey instruments can be composed for the main study. The primary purposes of the Operational Field Test are to obtain information on recruiting, particularly for the targeted disability groups; on obtaining a tracking sample that can be used to study mobility patterns in subsequent years; and on administrative procedures.

Dated: June 11, 2015.
