**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

The National Park Service Act of 1916, 38 Stat 535, 16 U.S.C. 1, *et seq.*, requires that the NPS preserve national parks for the enjoyment, education, and inspiration of this and future generations. Permit requirements and restrictions for recreational activities in the backcountry are governed in accordance with the regulations found at Title 36, Code of Federal Regulations, Sections 1.5, 1.6, and 2.10 (36 CFR 1.5, 1.6, 2.10, and 13.116). In order to monitor resources and wildlife in the Glacier Bay National Park and Preserve (GLBA) and to enhance the safety of future visitors, the park monitors all sightings and interactions by visitors with bears. Bear sighting data provides the park with important data used to determine bear movements, habitat use, and species distribution. First-hand accounts of how bears respond to people are important in understanding and detecting changes in bear behavior and identifying potential problem areas. Observations and interactions by visitors are recorded via the following two forms:

The NPS requires the submission of NPS Form 10-405, "Tatshenshini—Alesk River Bear Report Form 1" upon exiting the park backcountry in order to collect information regarding bear sightings within GLBA. The information collected via NPS Form 10-405 includes:

- Group name;
- Take-out date;
- Detailed information for each sighting documented on the form, to include:
  - Date/time;
  - Species type
  - Total number of bears seen together (for each sighting);
  - Bear unit type;
  - Estimation of distance between visitor and bear(s);
  - Whether the bear was aware of the group;
    - Bear reaction to group;
    - Activity of group;
    - Number of observers; and
    - Location description/campsite name/GPS position/other comments.

Submission of a completed NPS Form 10-406, "Tatshenshini—Alesk River Bear Information Management (BIM) Report Form 2" is required when a bear

enters camp, approaches the group, damages gear, obtains food, and/or acts in an aggressive or threatening manner towards the group. The information collected via NPS Form 10-405 includes:

- Name and phone number of the primary person involved in the interaction;
- Group type: Park visitor, concession employee, contractor, researcher, NPS employee, or other;
- Number of people who encountered the bear;
- Corresponding sighting number on NPS Form 10-105; Location 1-28 (Backcountry vs Developed Area A and B);
- Types of vegetation in area of encounter;
- The bear's activity when it was first observed;
- The group's activity prior to seeing the bear;
- The bear's initial and subsequent reaction to the group;
- Group's response to bear's reaction;
- Group's distance to the bear;
- Whether food was present, and if so, if it was eaten by the bear;
- Whether property was damaged;

- Detailed description of the interaction;
- Detailed description of the bear, to include color, markings, scars, tags, etc.;
- Date, time, and duration of encounter;
- Exact location of encounter documented on map provided by GLBA, to include the latitude/longitude; and,
- Where did the individual learn about how to behave while in bear country?
