Abstract: The Montreal Protocol on Substances that Deplete the Ozone Layer (Protocol) and Title VI of the Clean Air Act Amendments of 1990 (CAA) established limits on total U.S. production, import, and export of Class I and Class II controlled ozone depleting substances (ODSs). Under its Protocol commitments, the United States has been obligated to cease production and import of Class I controlled substances with exemptions for essential uses, critical uses, previously used material, and material that will be transformed, destroyed, or exported to developing countries. The Protocol also establishes limits and reduction schedules leading

to the eventual phaseout of Class II controlled substances with similar exemptions beyond the phaseout. Additionally, the CAA has its own limits on production and consumption of controlled substances that EPA must adhere to and enforce.

To ensure the United States' compliance with the limits and restrictions established by the Protocol and the CAA, the ODS phaseout regulations establish control measures for individual companies. EPA monitors compliance with the limits and restrictions for individual United States companies through the recordkeeping and reporting requirements established in the regulations at 40 CFR part 82, subpart A. To submit required information, regulated entities can download reporting forms, complete them, and then send them to EPA via mail, fax, or electronically. Upon receipt of the reports, EPA enters and stores the data in the ODS Tracking System. The Tracking System is a secure database that maintains all of the data that is submitted to EPA and allows the Agency to: (1) Track over total production and consumption of controlled substances to satisfy conditions of the CAA and fulfill the United States obligations under the Protocol; (2) monitor compliance with limits and restrictions on production, imports, exports, and specific exemptions to the phaseout for individual U.S. companies; and (3) enforce against illegal imports and violations related to the control of Class I and Class II substances. Additionally, reporting on the exemptions allows an entity to retain the benefit of being able to produce or import a controlled Class I ODS beyond the date of complete phaseout.

Pursuant to regulations 40 CFR part 2, subpart B, reporting businesses are entitled to assert a business confidentiality claim covering any part of the submitted business information as defined in 40 CFR part 2, subpart B.

Respondents/affected entities: Chemical Producers, Importers, and Exporters (CFCs); Research and Development (Laboratories); and MeBr Producers, Importers, Exporters, Distributors, and Applicators.

Estimated number of respondents: 1845 (total).

Frequency of response: quarterly, annually, occasionally.

Total estimated burden: 2583 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$280,055 (per year), includes \$5,535 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in the total estimated respondent burden compared with the ICR currently approved by OMB.

Acting Director, Collection Strategies Division.
