I. Background on the Project

The purpose of the Proposed Action
is to allow continued operations of the
FCPP and Navajo Mine and operation of
the associated transmission lines. The
Proposed Action would be consistent
with federal Indian trust policies,
including, but not limited to, a
preference for tribal self-determination
and promoting tribal economic
development for all tribes affected by
the Proposed Action. The Final
Environmental Impact Statement (FEIS)
evaluates the direct, indirect, and
cumulative impacts of the Proposed
Action at the FCPP, the proposed
Pinabete Permit area, the existing
Navajo Mine Permit area, and the rights-
of-way renewals for segments of four
transmission lines that transmit power
from the FCPP. The public may view
information about the Proposed Action
on OSMRE's Web site at: [http://
www.wrcc.osmre.gov/Current
Initiatives/FCNAVPRJ/FCPPEIS.shtm](http://www.wrcc.osmre.gov/CurrentInitiatives/FCNAVPRJ/FCPPEIS.shtm).

Cooperating agencies for this National
Environmental Policy Act (NEPA)
process include: The Bureau of Indian
Affairs (BIA), the Bureau of Land
Management (BLM), the U.S.
Environmental Protection Agency
(USEPA), the U.S. Fish and Wildlife
Service (USFWS), the National Park
Service (NPS), the U.S. Army Corps of
Engineers (USACE), the Navajo Nation,
and the Hopi Tribe.

OSMRE complied with Section 106 of
the National Historic Preservation Act
(54 U.S.C. 300101 *et seq.*) (NHPA
Section 106) as provided for in 36 CFR
800.2(d)(3) concurrent with the NEPA
process, including public involvement
requirements and consultation with the
State Historic Preservation Officer and

Tribal Historic Preservation Officer. Consultation with Tribes and individual Native Americans were conducted in accordance with applicable laws, regulations, and Department of the Interior (DOI) trust policy as summarized in the FEIS. Consultation is complete and Programmatic Agreements have been signed by the consulting parties. These agreements are included as attachments to the FEIS.

OSMRE also conducted formal consultation with the USFWS pursuant to Section 7 of the Endangered Species Act (ESA; 16 U.S.C. 1536) and associated implementing regulations (50 CFR part 400). This formal consultation considered direct, indirect, and cumulative effects from the Proposed Action, and USFWS prepared a Biological Opinion which is included as an attachment to the FEIS.

Federal actions related to FCPP and Navajo Mine Energy Project will comply with all applicable laws and regulations, including: The Indian Business Site Leasing Act, 25 U.S.C. 415; the General Right-of-Way Act of 1948, 25 U.S.C. 323–328; the Surface Mining Control and Reclamation Act of 1977 (SMCRA), 30 U.S.C. 1201–1328; the Clean Water Act, 33 U.S.C. 1251–1387; the Clean Air Act, 42 U.S.C. 7401–7671q; the Native American Graves Protection and Repatriation Act, 25 U.S.C. 3001–3013; and Executive Orders relating to Environmental Justice, Sacred Sites, and Government-to-Government Consultation.

II. Background on Lease Amendment No. 3 at the Four Corners Power Plant

The FCPP is a coal-fired electric generating station located on Navajo tribal trust lands. FCPP currently includes two energy generation units producing approximately 1,500 megawatts, and provides power to more than 500,000 customers throughout the southwestern U.S. Nearly 80 percent of the employees at the plant are Native American. Arizona Public Service (APS) operates the FCPP and executed a lease amendment (Lease Amendment No. 3) with the Navajo Nation to extend the term of the FCPP lease for an additional 25 years, to 2041. Continued operation of the FCPP would require several federal actions, including:

- BIA approval of Lease Amendment No.3 for the FCPP, pursuant to 25 U.S.C. 415. As approved, the ash disposal area would be expanded within the existing FCPP lease area. There are no additional proposed changes to the FCPP, the switch yard, or any of the transmission lines and ancillary facilities, as part of the Proposed Action.

- BIA issuance of renewed rights-of-way, pursuant to 25 U.S.C. 323, for the continued operation of the FCPP, switchyard, and ancillary facilities; for a 500 kilovolt (kV) transmission line and two 345 kV transmission lines; and for ancillary transmission line facilities, including the Moenkopi Switchyard, an associated 12 kV line, and an access road (collectively the “existing facilities”). These existing facilities are located on Navajo tribal trust lands, except for the 500 kV transmission line, which crosses both Navajo and Hopi tribal trust lands. The Proposed Action would continue operation and maintenance of these facilities. No upgrades to the existing facilities are part of the Proposed Action.

- BIA issuance of renewed rights-of-way to the Public Service of New Mexico (PNM) for the existing 345 kV transmission line. The transmission line will continue to be maintained and operated as part of the Proposed Action. No upgrades to this transmission line are planned as part of the Proposed Action.

In August 2012, the USEPA published its Federal Implementation Plan (FIP) for the Best Available Retrofit Technology (BART) at FCPP (40 CFR 49.5512). As a result, APS decommissioned Units 1, 2, and 3 at the FCPP in December 2013, and will install selective catalytic reduction equipment on Units 4 and 5 by 2018.

III. Background on Pinabete Mine Permit and the Navajo Mine Permit Renewal

NTEC proposes to conduct surface coal mining operations within a new 5,659-acre permit area, called the Pinabete Permit area. This proposed permit area lies within the boundaries of the existing Navajo Mine lease, which is located adjacent to the FCPP on Navajo tribal trust lands. Surface mining operations would occur on an approximately 2,744-acre portion of the proposed Pinabete Permit area, with a total disturbance footprint, including staging areas, of approximately 4,100 acres. The proposed Pinabete Permit area would, in conjunction with the mining of any reserves remaining within the existing Navajo Mine Permit area (Federal SMCRA Permit NM0003F), supply low-sulfur coal to the FCPP at a rate of approximately 5.8 million tons per year. Development of the Pinabete Permit area and associated coal reserves would use surface mining methods, and based on current projected customer needs, would supply coal to FCPP for up to 25 years beginning in 2016. The proposed Pinabete Permit area would include previously permitted but

undeveloped coal reserves within Area IV North of the Navajo Mine Lease, and unpermitted and undeveloped coal reserves in a portion of Area IV South of the existing Navajo Mine Lease. Approval of the proposed Pinabete Permit would require several federal actions, including:

- OSMRE approval of the new SMCRA permit.

- BLM approval of a revised Mine Plan developed for the proposed maximum economic recovery of coal reserves.

- USACE approval of a Section 404 Individual Permit for impacts to waters of the United States from proposed mining activities.

- USEPA approval of a new source Section 402 National Pollutant Discharge Elimination System (NPDES) Industrial Permit associated with the mining and reclamation operations and coal preparation facilities.

- BIA approval of a proposed realignment for approximately 2.8 miles of BIA 3005/Navajo Road N–5082 (Burnham Road) in Area IV South to avoid proposed mining areas. This realignment would not be needed until 2022; however, the potential impacts of this realignment are analyzed in the FEIS.

- BIA approval or grant of permits or rights-of-way for access and haul roads, power supply for operations, and related facilities.

In addition, in 2014, OSMRE administratively delayed its decision on NTEC's renewal application for its existing Navajo Mine SMCRA Permit No. NM00003F. The EIS, therefore, also addresses alternatives and direct, indirect, and cumulative impacts of the 2014 renewal application action.

IV. Alternatives

Alternatives considered in the EIS include three different mine plan configurations at Navajo Mine; implementing highwall or longwall mining techniques at the Navajo Mine; two different ash disposal facility configurations at FCPP; conversion of FCPP to a renewable energy plant; implementing carbon capture and storage at FCPP; and use of an off-site coal supply option for FCPP.

V. Revisions to the Draft EIS

In accordance with the CEQ's regulations for implementing NEPA and the DOI's NEPA regulations, OSMRE solicited public comments on the Draft EIS. OSMRE responses to comments are included in Appendix F of the FEIS. Comments on the Draft EIS received from the public were considered and incorporated as appropriate into the

FEIS. Public comments resulted in the addition of clarifying text, but did not change any of the impact analyses or significance determinations.

In addition, the FEIS includes updates based on evolving regulatory guidance and completion of the Section 106 and Section 7 consultation processes.

The EPA published the Notice of Availability of the Final Environmental Impact Statement in the **Federal Register** by the OSMRE (80 FR 24965) on May 1, 2015. Printed and CD copies of the Draft EIS and Final EIS are available at the same locations as listed in **ADDRESSES** above. The ROD conditions OSMRE, BIA and BLM's approval on all mitigation measures identified in the Final EIS and additional mitigation measures identified in the Final Biological Opinion and the ROD.

Because BIA's and BLM's decision is approved by the Secretary of the Interior, it is not subject to administrative appeal in accordance with the regulations at 43 CFR 4.410(a)(3). Any challenges to BIA & BLM's decisions, must be brought in federal district court. OSMRE's decisions may be appealed by a person with an interest which is or may be adversely affected under the procedures set forth in 30 CFR 775 and 43 CFR part 4.
