Proposed Collection: Process and Outcomes Evaluation of NCI Physical Sciences in Oncology Centers (PS-OC) Initiative (NCI), 0925-NEW, National Cancer Institute (NCI), National Institutes of Health (NIH).

Need and Use of Information Collection: The NCI launched the Physical Sciences—Oncology Center (PS-OC; <http://physics.cancer.gov/>) program in 2009 as Phase I of the Physical Sciences in Oncology (PSO) Initiative. The PSO Initiative seeks to establish research projects that bring together cancer biologists and oncologists with scientists from the fields of physics, mathematics, chemistry, and engineering to address some of the major questions and barriers in cancer research. As part of this initiative, evaluation plans were developed and consisted of three components, dependent on which year

the initiative is in: Prospective for beginning, structured for mid-point, and summative/full outcome evaluation for a decade after the program started. In 2015 the PSO Initiative is transitioning from the beginning to a mid-point phase, which represents a critical time to reflect on the initial outcomes and restructure the process evaluation to account for changes mid-way through the initiative. This proposed request is to conduct on-line surveys with current and former trainees and NCI grantees associated with the program and comparison groups. Additionally, an assessment of publications generated through the PS-OC program will be conducted via a virtual expert review panel. The evaluation will address trainee development and career path post program involvement as well as the impact of the program involvement on program outputs. Results from both the surveys and the expert peer reviewer panel will assess research innovation from the program and inform the future development of the PSO Initiative. This request is to gain OMB approval for the new submission titled, "Process and Outcomes Evaluation of NCI Physical Sciences in Oncology Centers (PS-OC) Initiative (NCI)" for 1 year.

OMB approval is requested for 1 year. There are no costs to respondents other than their time. The total estimated annualized burden hours are 955.

Survey	Former NCI Trainees	340	1	25/60	142
