

Retrieval. The NHTS data will be collected from respondents either from self-reporting via the web, or from professionally trained interviewers using a computer-assisted telephone interviewing (CATI) system. Either approach will be based upon a single database that allows for sophisticated branching and skip patterns to enhance data retrieval by asking only those questions that are necessary and appropriate for the individual participant. Look-up tables are included to assist with information such as vehicle makes and models. The Google map UI is used to assist in identifying specific place names and locations. The location data for the participant's home, workplace, or school are stored and automatically inserted in the dataset for trips after the first report. Household rostering is a list of all vehicles and persons in the household that allows a trip to be reported from one household member and can include another household member who travel together to be inserted into the record for the second person. This automatic insert of information reduces the burden of the second respondent to be queried about a trip already reported by the initial respondent.

Data range, consistency and edit checks are automatically programmed to reduce reporting error, survey length, and maintain the flow of information processing. Data cross checks also help reduce the burden by ensuring that the reporting is consistent within each trip.

Data retrieval is based upon materials provided to participants as shown below.

Travel Log Materials

Travel Log Packet. The travel log packet will include a letter, an exemplar log, and personalized travel logs for each age eligible person in the household, and will be sent using first class postage in a 6" x 9" envelope. The envelopes will be branded to match the letterhead used for the invitation letter. The second respondent incentive will be included with the travel logs. This \$5 cash incentive is expected to serve as a "good faith" incentive to encourage completion of the retrieval survey.

Travel Log Letter. A household letter will be included in the travel log packet. The letter will further familiarize the participants with the travel recording stage, identify the households' travel date and provide details about when and how to complete the retrieval survey. The letter will also remind participants about the final \$20 household incentive. Like the invitation letter, the travel log letter will be branded.

Travel Logs. A personalized travel log will be provided for each household member (ages 5 and older). The logs are intended to be a memory jogger to guide accurate data collection and aid in the reporting of each place visited on the travel day.

Exemplar Log. Participants will be provided with an exemplar log with the instructions for recording the details about the places visited on the travel day.

All Web and computer assisted telephone interview (CATI) instruments will be reviewed for section 508 compliance using the rules specified in sections 1194.22—'Web-based intranet and internet information and applications' and 1194.23—'Telecommunications products.' All materials will be available in both English and Spanish language forms. Spanish translations will be developed using industry standards and will apply reverse-translation protocols.

Estimated Burden Hours for Information Collection

Frequency: This collection will be conducted every 5–7 years.

Respondents. A stratified random sample of 26,000 households across the 50 states and the District of Columbia will be included in the survey. Household will include an average of 2.5 members for a total of 65,000 individual respondents to the main survey.

Estimated Average Burden per Response. It will take approximately 5 minutes per household member to complete the recruitment data form, and 20 minutes to complete the retrieval survey. This results in a total of 25 minutes per household member.

Estimated Total Annual Burden Hours. It is estimated that a total of 65,000 persons will be included in the survey. This would result in approximately 27,083 hours of support for this data collection effort.

Public Comments Invited

You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection of information is necessary for the USDOT's performance, including whether the information will have practical utility; (2) the data acquisition methods; (3) the accuracy of the USDOT's estimate of the burden of the proposed information collection; (4) the types of data being acquired; (5) ways to enhance the quality, usefulness, and clarity of the collected information; and (6) ways that the burden could be minimized without reducing the quality of the collected information. The agency

will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Federal Highway Administration

Notice of Final Federal Agency Actions on US 281, From Loop 1604 to Borgfeld Drive in Bexar County, Texas

AGENCY: Federal Highway Administration (FHWA), U.S. DOT.

ACTION: Notice of limitation on claims for judicial review of actions by TxDOT and Federal agencies.

SUMMARY: This notice announces actions taken by Texas Department of Transportation (TxDOT) and Federal agencies that are final within the meaning of 23 U.S.C. 139(l)(1). The actions relate to a proposed highway project, US 281, from Loop 1604 to Borgfeld Drive in Bexar County in the State of Texas. Those actions grant licenses, permits, and approvals for the project.

DATES: By this notice, TxDOT is advising the public of final agency actions subject to 23 U.S.C. 139(l)(1). A claim seeking judicial review of the Federal agency actions on the highway project will be barred unless the claim is filed on or before December 28, 2015. If the Federal law that authorizes judicial review of a claim provides a time period of less than 150 days for filing such claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: Mr. Carlos Swonke, P.G., Environmental Affairs Division, Texas Department of Transportation, 125 East 11th Street, Austin, Texas 78701; telephone: (512) 416–2734; email: carlos.swonke@txdot.gov. TxDOT's normal business hours are 8:00 a.m.–5:00 p.m. (central time), Monday through Friday.

SUPPLEMENTARY INFORMATION: Notice is hereby given that TxDOT and Federal agencies have taken final agency actions by issuing licenses, permits, and approvals for the following highway project in the State of Texas: US 281, from Loop 1604 to Borgfeld Drive. The project will expand the US 281 to a six-

lane expressway with partial access-controlled outer lanes. From Loop 1604 to Stone Oak Parkway, the expressway lanes would include two non-toll general purpose lanes with an auxiliary lane plus one managed lane in each direction. The expressway lanes would be situated between three partial access-controlled outer lanes in each direction, also known as frontage roads. From Stone Oak Parkway to Borgfeld Drive, US 281 would ultimately be expanded to a six-lane expressway (three managed lanes in each direction) with two non-toll outer lanes in each direction. The purpose of the project is to improve mobility and accessibility, enhance safety, and improve community quality of life.

The actions by TxDOT and the Federal agencies, and the laws under which such actions were taken, are described in the final Environmental Impact Statement (EIS) issued on May 8, 2015 for the project, for which a Record of Decision (ROD) was issued on July 17, 2015, and in other documents in the TxDOT administrative record. The EIS, ROD, and other documents in the administrative record file are available by contacting TxDOT at the address provided above. The EIS and ROD may also be viewed and downloaded from the project Web site at <http://www.411on281.com/us281eis/>.

SUPPLEMENTARY INFORMATION:

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated May 14, 2015, the Pacific Railroad Preservation Association (PRPA) has petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 230—Steam Locomotive Inspection and Maintenance Standards. FRA assigned the petition Docket Number FRA–2015–0055.

PRPA is the operator of Spokane, Portland, and Seattle steam locomotive No. 700 (SP&S 700). PRPA is a member of the Oregon Rail Heritage Foundation (ORHF) in Portland, Oregon. SP&S 700 is a 4–8–4 “Northern” type of steam locomotive built by the Baldwin Locomotive Works in 1938. PRPA typically operates SP&S 700 for 31 service days or less per year, and expects to continue to do so in the future. PRPA requests a 138-calendar-day extension as it pertains to the 1,472 service-day inspection of the boiler as
