

that the state, tribe, or local government will use to implement the electronic reporting. Additionally, § 3.1000(b) through (e) of 40 CFR part 3, subpart D provides special procedures for program revisions and modifications to allow electronic reporting, to be used at the option of the state, tribe or local government in place of procedures available under existing program-specific authorization regulations. An application submitted under the subpart D procedures must show that the state, tribe or local government has sufficient legal authority to implement the electronic reporting components of the programs covered by the application and will use electronic document receiving systems that meet the applicable subpart D requirements. Once an authorized program has EPA's approval to accept electronic documents under certain programs, CROMERR § 3.1000(a)(4) requires that the program keep EPA apprised of any changes to laws, policies, or the electronic document receiving systems that have the potential to affect the program's compliance with CROMERR § 3.2000.

On May 8, 2015, the Alaska Department of Environmental Conservation (ADEC) submitted an amended application titled Air Online Service System for revisions/modifications to its EPA-approved program under title 40 CFR to allow new electronic reporting. EPA reviewed ADEC's request to revise/modify its EPA-authorized programs and, based on this review, EPA determined that the application met the standards for approval of authorized program revisions/modifications set out in 40 CFR part 3, subpart D. In accordance with 40 CFR 3.1000(d), this notice of EPA's decision to approve Alaska's request to revise/modify its following EPA-authorized programs to allow electronic reporting under 40 CFR parts 51, 52, 60–63, and 70 is being published in the **Federal Register**: Part 52—Approval and Promulgation of Implementation Plans; Part 60—Standards Of Performance For New Stationary Sources; Part 62—Approval and Promulgation of State Plans for Designated Facilities and Pollutants; and Part 70—State Operating Permit Programs.

ADEC was notified of EPA's determination to approve its application with respect to the authorized programs listed above.

**Abstract:** The NSPS for nitric acid plants (40 CFR part 60, subpart G) were proposed on August 17, 1971, and promulgated on June 14, 1974. This information collection is for a new Subpart Ga, which will apply to nitric acid production units which commence construction, modification, or reconstruction after October 14, 2011. Nitrogen oxide (NO<sub>x</sub>) is the pollutant regulated under this subpart. The standards limit nitrogen oxides, expressed as nitrogen dioxide (NO<sub>2</sub>), to 0.50 lb per ton of 100 percent nitric acid produced.

**Form Numbers:** None.

**Respondents/affected entities:** Nitric acid plants constructed, reconstructed or modified after October 14, 2011.

**Respondent's obligation to respond:** Mandatory (40 CFR part 60, subpart Ga).

**Estimated number of respondents:** 6 (total).

**Frequency of response:** Initially and occasionally.

**Total estimated burden:** 1,370 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$386,000 (per year), which includes \$248,000 in both annualized capital and operation & maintenance costs.

**Changes in the Estimates:** There is an adjustment increase in the respondent and Agency burden due to an increase in the estimated number of sources. Our research during the rule development indicated an average of 1.2 new sources per year will become subject to the rule. We assume the industry will continue to grow linearly at this rate. This also

results in an increase in annual O&M costs.
