Title of Collection: Study of Enhanced College Advising in Upward Bound.

OMB Control Number: 1850–0912.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 2,836.

Total Estimated Number of Annual Burden Hours: 885.

Abstract: The Study of Enhanced College Advising in Upward Bound will test the effectiveness of providing Upward Bound projects with a professional development package and tools to provide semi-customized college advising to students participating in Upward Bound. Upward Bound projects were invited to volunteer for the demonstration, and approximately 200 projects that volunteered for the demonstration are included. Volunteer projects will be randomly assigned so that half receive the staff training, materials, tools, and resources in the first wave (spring 2015), and the other half will receive the staff training, materials, tools, and resources in the second wave (summer and fall 2016). The study will follow students who participate in both groups of projects as 11th graders in the 2014–2015 school year. The study will examine the impact of the demonstration on key outcomes including college application behavior, college acceptance and matriculation, and receipt of financial aid. The first of two ICRs for the study requested approval for the overall evaluation design, to collect 11th grade student rosters at each participating project and to administer the student baseline survey; the first ICR was approved on 8/8/2014. This is the second of two ICRs and requests approval for the remaining data collection activities, including a project survey, a follow-up student survey, and administrative records. Three reports will be produced, with

one (expected 2017) reporting on the outcomes measures prior to high school graduation; a second (expected 2018) reporting on the results regarding actual college enrollment, college selectivity and use of Federal financial aid; and a third (expected 2020) reporting results regarding college persistence. The analyses will be both descriptive (distributions and means) and causal (using standard regression analyses to estimate impacts).

Title of Collection: ED School Climate Surveys (EDSCLS) Benchmark Study 2016.

OMB Control Number: 1850—NEW.

Type of Review: A new information collection.

Respondents/Affected Public: Voluntary.

Total Estimated Number of Annual Responses: 358,649.

Total Estimated Number of Annual Burden Hours: 190,665.

Abstract: The ED School Climate Surveys (EDSCLS) are a suite of survey instruments being developed for schools, districts, and states by the U.S. Department of Education's (ED) National Center for Education Statistics (NCES). This national effort extends current activities that measure school climate, including the state-level efforts of the Safe and Supportive Schools (S3) grantees, which were awarded funds in 2010 by the ED's Office of Safe and Healthy Students (OSHS) to improve

school climate. Through the EDSCLS, schools nationwide will have access to survey instruments and a survey platform that will allow for the collection and reporting of school climate data across stakeholders at the local level. The surveys can be used to produce school-, district-, and state-level scores on various indicators of school climate from the perspectives of students, teachers, noninstructional school staff and principals, and parents and guardians. This request is to conduct a national EDSCLS benchmark study, collecting data from a nationally representative sample of schools across the United States, to create a national comparison point for users of EDSCLS. A nationally representative sample of 500 schools serving students in grades 5–12 will be sampled to participate in the national benchmark study in spring 2016. The data collected from the sampled schools will be used to produce national school climate scores on the various topics covered by EDSCLS, which will be released in the updated EDSCLS platform and provide a basis for comparison between data collected by schools and school systems and the national school climate.
