II. Introduction

The NRC is considering issuance of an amendment to Facility Operating License No. NPF-38, issued to Entergy Operations, Inc., for operation of the Waterford Steam Electric Station, Unit 3, located in St. Charles County, Louisiana.

By letter dated July 2, 2015 (ADAMS Accession No. ML15197A106), as supplemented by letter dated August 14, 2015 (ADAMS Accession No. ML15226A346), the licensee submitted an application for a license amendment request. The proposed amendment would change TS 3.1.3.4 to revise the arithmetic average of all CEA drop times to be less than or equal to 3.5 seconds.

Before any issuance of the proposed license amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended (the Act), and NRC's regulations.

The NRC has made a proposed determination that the license amendment request involves no significant hazards consideration. Under the NRC's regulations in § 50.92 of Title 10 of the *Code of Federal Regulations* (10 CFR), this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR
