DEPARTMENT OF JUSTICE

[OMB Number 1105-0025]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension Without Change, of a Previously Approved Collection Federal Coal Lease Request

AGENCY: Antitrust Division, Department of Justice.

ACTION: 60-day notice.

SUMMARY: The Department of Justice (DOJ), Antitrust Division (ATR), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until November 9, 2015.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Jill Ptacek, Attorney, Antitrust Division, United States Department of Justice, 450 Fifth Street NW., Suite 8000, Washington, DC 20530 (phone: 202-307-6607).

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a currently approved collection.

2. *The Title of the Form/Collection:* Federal Coal Lease Reserves.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* The form numbers are ATR-139 and

ATR-140. The applicable component within the Department of Justice is the Antitrust Division.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Business or other for profit. Other: None. The Department of Justice evaluates the competitive impact of issuances, transfers and exchanges of federal coal leases. These forms seek information regarding a prospective coal lessee's existing coal reserves. The Department uses this information to determine whether the issuance, transfer or exchange of the federal coal lease is consistent with the antitrust laws.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that 20 respondents will complete each form, with each response taking approximately two hours.

6. *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 40 annual burden hours associated with this collection, in total.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405B, Washington, DC 20530.

Dated: September 4, 2015.

Jerri Murray,

Department Clearance Officer for PRA, U.S. Department of Justice.

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M–2015–016–C.

Petitioner: Booth Energy LLC, P. O. Box 190, Lovely, Kentucky 41231.

Mines: Matrix Energy LLC, No. 1 Mine, MSHA I.D. No. 15–18575; Coalburg Enterprises Inc., No. 9 Mine,

MSHA I.D. No. 15–19625; Eagle Coal Company Inc., No. 25 Mine, MSHA I.D. No. 15–19488, all located in Martin County, Kentucky; and Coalburg Enterprises Inc., No. 7 Mine, MSHA I.D. No. 15–19509, located in Lawrence County, Kentucky.

Regulation Affected: 30 CFR 75.1506(a)(1) (Refuge alternatives).

Modification Request: The petitioner requests a modification of the existing standard to allow for alternate examination of Mine Shield underground shelters. The petitioner seeks modification of the standard as it applies to testing, examinations, and repairs by the refuge manufacturer (Mine Shield LLC located at 322 Crab Orchard Road, Lancaster, Kentucky 40444). The petitioner states that:

(1) There are a total of 17 shelters installed in the mines listed above, which are of three different types manufactured by Mine Shield LLC. Type A is the CF210A model; type B is the CF208A model; and type C is the CF208B model. All the units have been retrofitted as prescribed by MSHA.

(2) Testing and examination cannot be accomplished according to the manufacturer’s recommendation since Mine Shield LLC is no longer in business.

(3) The testing, examinations and repairs as required by the manufacturer’s recommendation cannot be conducted since the manufacturer’s technicians are no longer available. The petitioner proposes to:

—Have certified and qualified persons as defined in 30 CFR 75.151 conduct all testing, examination, and repairs. Items to be tested, examined, and repaired are listed in Attachment C of this petition. A sufficient number of trained personal will be provided, a list of qualified examiners will be posted at each mine, and proof of training will be verifiable by MSHA forms 5000–23.

—Adhere to and comply with all provisions of the Manufacturer’s Service Manual on all shelters.

—Train all examiners and repairmen through the WHA International Inc., Mr. Elliot Forsyth, BSME PE Chief, Technical Training Officer, Senior Oxygen Safety & Forensic Engineer, or his equivalent, on Level 1, Level 2, and Level 3.

—Train all examiners and repairmen in use of, and equip them with, a state of the art IBRID MX6 Gas Monitor (MSHA approval #07–LPA–130006, Part Approval #222–A080002–0) gas monitoring device manufactured by Industrial Scientific Inc.

—Record and retain the results of all examinations, tests, and repairs for

one year and make available to MSHA.

Within 60 days after the Proposed Decision and Order (PDO) becomes final, the petitioner will submit proposed revisions for its approved part 48 training plan to the District Manager. These proposed revisions will specify initial and refresher training regarding the terms and conditions stated in the PDO.

The petitioner asserts that application of the existing standard will result in diminution of safety the miners and that the proposed alternative method will guarantee no less than the same measure of protection afforded by the existing standard.

Docket Number: M–2015–017–C.

Petitioner: ICG Illinois, LLC, 5945 Lester Road, Williamsville, Illinois 62693.

Mine: Viper Mine, MSHA I.D. No. 11–02664, located in Sangamon County, Illinois.

Regulation Affected: 30 CFR 75.312(c) (Main mine fan examinations and records).

Modification Request: The petitioner requests a modification of the existing standard to allow the automatic fan signal device to be tested every 31 days without stopping the fan each time the device is tested. The petitioner states that:

1. The Viper Mine’s existing automatic fan signal device is a Model CT7100 Omega Circular Chart Recorder. The device continuously monitors and records the fan’s operating pressure.

2. The main mine fan has a normal operating pressure of approximately 8 inches of water gauge, as measured by the chart recorder.

3. An alarm signal will be activated when the fan pressure falls below 6 inches of water gauge. The petitioner proposes to:

—Install a lockable ball valve in the tubing connecting the chart recorder to the fan ductwork where pressure is measured and another between the tubing and the natural atmosphere.

—Close the valve to the atmosphere and open the valve to the fan ductwork during normal operation to allow the chart recorder to continuously monitor the fan pressure when the fan is running.

—Close the valve to the fan ductwork and open the valve to the atmosphere during the 31-day checks to allow the pressure to the chart recorder to drop and signal the alarm indicating loss of fan pressure. In conjunction with the proposed 31-day fan signal checks, the petitioner will conduct a fan

signal check by stopping the fan at intervals not to exceed six months.

The petitioner asserts that the proposed alternative method will guarantee no less than the same measure of protection afforded by the existing standard.

Docket Number: M–2015–018–C.

Petitioner: Macoupin Energy, LLC, P.O. Box 615, 14300 Brushy Mound Road, Carlinville, Illinois 62626.

Mine: Shay #1 Mine, MSHA I.D. No. 11–00726, located in Macoupin County, Illinois.

Regulation Affected: 30 CFR 75.1909(b)(6) (Nonpermissible diesel-powered equipment; design and performance requirements).

Modification Request: The petitioner requests an amendment to a previously granted petition for modification of January 2, 2000, for the Monterey Coal Company, Docket Number M–1999–56–C, to train operators to lower the moldboard (grader blade) in emergency conditions, which will provide an equivalent level of safety to the standard's requirement that each wheel of the grader be equipped with services brakes. The petitioner states that:

1. On January 22, 2009, Macoupin Energy, LLC acquired Monterey #1 Mine from Monterey Coal Company and renamed the mine Shay #1 Mine. The MSHA Mine I.D. (No. 11–00726) and the address remain the same. MaRyan Mining, LLC is the contracted operator of the mine.

2. The approved petition is for a Getman Grader Model No. RDG 1504S, Serial No. 6345.

3. Macoupin Energy is requesting the approved petition be amended to add a second Getman Grader Model No. RDG 1504C, Serial No. 6718. This grader is similar to the currently approved grader and would also be provided an equivalent level of safety to the standard's requirement that each wheel of the grader be equipped with service brakes by training the grader operator to lower the moldboard in emergency conditions.

4. The grader has 12.00 × 20.00 tires, which also limit the speed to 10 miles per hour.

The petitioner requests that the terms and conditions of the previously granted petition be applied to the additional grader, which the petitioner asserts will provide an equivalent level of safety as the existing standard.

Dated: September 3, 2015.

Acting Director, Office of Standards, Regulations, and Variances.
