Abstract: Under the Clean Air Act (CAA), EPA granted partial waivers that allow gasoline containing greater than 10 volume percent (vol%) ethanol up to 15 vol% ethanol (E15) to be introduced into commerce for use in model year (MY) 2001 and newer light-duty motor vehicles, subject to certain conditions. EPA issued final rule establishing several measures to mitigate misfueling of other vehicles, engines and equipment with E15 and the potential emissions consequences of misfueling. The rule prohibits the use of gasoline containing more than 10 vol% ethanol in vehicles, engines and equipment that are not covered by the partial waiver decisions. The rule also requires all E15 gasoline fuel dispensers to have a specific label when a retail station or wholesale-purchaser consumer chooses to sell E15. In addition, the rule requires that product transfer documents (PTDs) specifying ethanol content and Reid Vapor Pressure (RVP) accompany the transfer of gasoline blended with ethanol, and a survey of retail stations to ensure compliance with these requirements. The rule also modifies the Reformulated Gasoline (RFG) program by updating the Complex Model to allow fuel manufacturers to certify batches of gasoline containing up to 15 vol% ethanol. This ICR supporting statement addresses associated recordkeeping and reporting items.

Respondent’s obligation to respond: Mandatory (40 CFR part 80).

Estimated number of respondents: 2,103 (total).

Estimated number of responses: 44,000,103.

Frequency of response: On occasion.
Total estimated burden: 13,270 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$ 1,340,292, which includes no annualized capital or operation & maintenance costs.

Changes in Estimates: We expect there will be a decrease in the total estimated respondents, responses and

cost to the industry compared to the ICR currently approved by OMB. This change in burden is due to no longer requiring the programing of product transfer codes in this collection. The respondent universe decreased from 6,211 to 2,103, a difference of 4,108 members. The number of responses declined from 44,010,211 to 44,000,103, a difference of 10,108 reports. This reduced the industry burden hours from 37,350 to 13,270.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. Abstract: The affected entities are subject to the General Provisions of the NESHP (40 CFR part 63, subpart A), and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart BBBBB. Owners or operators of the affected facilities must submit an initial notification report, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities:

Semiconductor manufacturing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart BBBBB).

Estimated number of respondents: 1 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 41 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$4,710 (per year), including \$550 in either annualized capital/start-up and/or operation & maintenance costs.

Changes in the Estimates: There is a small increase in the respondent burden from the most-recently approved ICR due to an update in assumption and an adjustment in labor rates. In this ICR, we assume the existing major source will read and re-familiar with the rule requirement annually. We have also updated all burden calculations using the latest labor rates from the Bureau of Labor Statistics.

Division.*
