Abstract: The affected entities are subject to the General Provisions of the NESHAP (40 CFR part 63, subpart A), and any changes, or additions, to the Provisions are specified at 40 CFR part 63, subpart OOOO. Owners or operators of the affected facilities must submit initial notification reports, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative.

Form Numbers: None.

Respondents/affected entities: Facilities involved in the printing, coating, slashing, dyeing or finishing of fabric and other textiles.

Respondent’s obligation to respond: Mandatory (40 CFR part 63, subpart OOOO).

Estimated number of respondents: 146 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 22,400 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,260,000 (per year), which includes a combined total of \$6,750 in both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in both the respondent and Agency burden, including an increase in the O&M cost. This is not due to any program changes; rather, it is due to an increase in the estimated number of sources. We assume an additional coating and printing facility will become subject to

the rule each year. In addition, we have updated all burden calculations using the latest labor rates, which contributes to an increase in cost.

Acting Director, Collection Strategies Division.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Reinforced Plastic Composites Production apply to existing and new facilities with reinforced plastic composites (RPC) production operations and processes. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart WWWW.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Any owner/operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintenance reports, and records. All
