SUPPLEMENTARY INFORMATION:

I. Abstract. This information collection implements the monitoring requirements discussed in the Post-delisting Monitoring Plan for the Bald Eagle (*Haliaeetus leucocephalus*) in the Contiguous 48 States (Plan). The Plan was developed to meet post-delisting requirements of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) (ESA). There are no specific corresponding Service regulations for the ESA's post-delisting monitoring requirement.

The bald eagle (*Haliaeetus leucocephalus*) in the lower 48 States was removed from the List of Endangered and Threatened Wildlife (delisted) on August 8, 2007 (72 FR 37346, July 9, 2007). Section 4(g) of the ESA requires that all species that are recovered and removed from the List of Endangered and Threatened Wildlife be monitored in cooperation with the States for a period of not less than 5 years. The purpose of this requirement is to detect any failure of a recovered species to sustain itself without the protections of the ESA. We work with relevant Federal, State, and tribal entities and other species experts to develop plans and procedures for systematically monitoring recovered wildlife and plants after a species is delisted. The bald eagle has a large geographic distribution that includes substantial non-Federal land. Although the ESA requires that monitoring of recovered species be conducted for not less than 5 years, the Plan reasoned that

the life history of bald eagles is such that it is appropriate to monitor this species for a longer period of time in order to meaningfully evaluate whether or not the bald eagle continues to maintain its recovered status.

We plan to monitor the status of the bald eagle in the 48 contiguous States using several information sources, including collecting data on nests over a 20-year period with sampling events in particular years. The Plan describes monitoring procedures and methods for surveying and estimating the number of occupied nests, which represents the

number of breeding pairs. The Plan is available at http://www.fws.gov/midwest/eagle/protect/FinalBAEA_PDMPPlan.html. We will use monitoring data to review the status of the bald eagle in the United States and determine if the population remains recovered under the ESA.
