

directed by the Antarctic Conservation Act of 1978 (Public Law 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Application Details

Permit Application: 2015–012

1. *Applicant:* Dr. Stephanie Jenouvrier, Woods Hole Oceanographic Institution, Woods Hole, MA 02453.

Activity for Which Permit is Requested: The applicant intends to collect a multi-scale and temporal baseline data set on the largest cluster of Adelie penguin breeding colonies in the Antarctic Peninsula (AP). The area near the Danger Islands in the Weddell Sea (eastern AP) may account for half of the total breeding population of Adelie penguins in the AP, yet these colonies are little known. Penguin population shifts have been documented in the western AP and this study will help reduce uncertainty for the eastern AP populations.

Take, Import, Enter Antarctic Specially Protected Areas: The applicant intends to obtain small samples of blood, tissue, feathers, and eggshells from Macaroni, Gentoo, Chinstrap, and Adélie penguin colonies the Antarctic Peninsula. Organic remains in soil samples will also be collected. Samples taken at the sites will be sent back to the United States and the United Kingdom for analysis. The breeding sites will be censused by ground or by a hexacopters-based aerial photography system.

Location: The focus of the study is the penguin colonies in the Danger Islands, Antarctic Sounds, Antarctic Peninsula. Should weather conditions preclude this area, the focus will shift to Elephant Island and vicinity, Low Island and vicinity and/or the South Shetland Islands. Visits may include the following ASPA's: ASPA No. 151, Lions Rump, King George Is; ASPA No. 126, Byers Peninsula, Livingston Island; ASPA No. 152, West Bransfield, Low Island; ASPA No. 132, Potter Peninsula; ASPA No. 128, West Admiralty Bay; ASPA No. 150, Ardley Island; ASPA No. 133, Harmony Point; and ASPA No. 149, Cape Shirreff.

Dates: 1 December 2015 through 30 June 2016.

Nadene G. Kennedy,
Polar Coordination Specialist, Division of Polar Programs.

NATIONAL SCIENCE FOUNDATION

Notice of Permit Modification Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of Permit Modification Request Received and Permit Issued under the Antarctic Conservation Act of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of requests to modify permits issued to conduct activities regulated and permits issued under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 671 of the Code of Federal Regulations. This is the required notice of a requested permit modification and permit issued.

DATES: September 16, 2015 to March 15, 2016.

FOR FURTHER INFORMATION CONTACT: Li Ling Hamady, ACA Permit Officer, Division of Polar Programs, Rm. 755, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Or by email: ACApermits@nsf.gov

SUPPLEMENTARY INFORMATION: The Foundation issued a permit (ACA 2012–WM–001) to Dr. George Watters on September 29, 2011. The issued permit allows the applicant to run a field camp including deployment of instruments (radio tags on animals) and use of hazardous materials including radio isotopes. A recent modification to this permit, dated December 21, 2013, permitted the applicant to install up to 12 remote, autonomous, and easily removable camera systems near breeding aggregations of Adélie, gentoo, and chinstrap penguins throughout ASPA #128 on King George Island. The cameras will provide time-lapse photography during breeding and non-breeding seasons to estimate key monitoring parameters such as arrival timing, reproductive chronology and success, chick production, overwinter attendance, and census data. Now the applicant proposes a permit modification to install up to 22 of these cameras within ASPA 128 The Environmental Officer has reviewed the

modification request and has determined that the amendment is not a material change to the permit, and it will have a less than a minor or transitory impact.

The permit modification was issued on September 16, 2015.

Nadene G. Kennedy,
Polar Coordination Specialist, Division of Polar Programs.

NATIONAL SCIENCE FOUNDATION

Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978 (Pub. L. 95–541)

AGENCY: National Science Foundation.

ACTION: Notice of Permit Applications Received under the Antarctic Conservation Act of 1978, (Pub. L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996 (Pub. L. 104–227).

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 671 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by October 22, 2015. This application may be inspected by interested parties at the Permit Office, address below.

ADDRESS: Comments should be addressed to Permit Office, Room 755, Division of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT: Polly A. Penhale, Environmental Officer, at the above address or ACApermits@nsf.gov or (703) 292–7149.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996 (Pub. L. 104–227), has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas requiring special protection. The regulations establish such a permit

system to designate Antarctic Specially Protected Areas.

Application Details

Permit Application: 2016-011

1. *Applicant:* Stephanie Jenourvriër, Woods Hole Oceanographic Institution, Woods Hole, MA 02453.

Activity for Which Permit is Requested: The applicant intends to collect a multi-scale and temporal baseline data set on the largest cluster of Adelie penguin breeding colonies in the Antarctic Peninsula (AP). The area near the Danger Islands in the Weddell Sea (eastern AP) may account for half of the total breeding population of Adelie penguins in the AP, yet these colonies are little known. Penguin population shifts have been documented in the western AP and this study will help reduce uncertainty for the eastern AP populations. Should the weather preclude reaching the site, alternative study sites have been identified.

Unmanned Aerial Vehicle (UAV) Filming: The applicant wishes to fly a small, battery operated, remotely-controlled quadrotor Unmanned Aerial Vehicle (UAV) in order to photograph penguin colonies as part of a multiscale spatial survey of penguin colonies. The primary flight mode for the vehicles will be automatic take off, landing, and waypoint using ground station software. The secondary/emergency mode is remote control operation of the UAV by a trained pilot on the ground. In both flight modes the quadcopter will always be flown within visible sight of the pilot and designated observers. Operations will only be conducted inside the 10m/s maximum wind speed estimate. The UAV will only be flown in visual meteorological conditions. Flights will be flown between 50 and 200 ft. above the colonies in keeping with previous experience by other researcher engaged in similar UAV-based surveys of wildlife in the Antarctic. A risk analysis and mitigation measures should reduce the risk of loss the UAV. The UAV pilots will be trained to the standard of ground school training provide for a private pilot's license and training on simulators and significant flight time with the UAVs will be conducted before deployment. The applicant is seeking a Waste Permit to cover any accidental releases that may result from flying a UAV.

Remote Cameras: The applicant wishes to deploy a network of four solar-powered, satellite-linked remote cameras to examine penguin vital rates. The time-lapse cameras, specially designed for this application, have been field tested over the winter at other sites

in the Antarctica. The cameras will be mounted on a scaffold pole supported by an aluminum tripod. No malfunctions or adverse effects were seen in previous deployments. The instruments also record air temperature. The cameras are intended to remain in situ and operate remotely for five seasons. The units are completely weatherproof and are powered by batteries that are charged via a solar cell.
Dates: 1 December 2015 through 1 January 2016.

Nadene G. Kennedy,
Polar Coordination Specialist, Division of Polar Programs.

certain geographic areas a requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

APPLICATION DETAILS:

1. *Applicant*
Brent S. Stewart, Ph.D., J.D., 3889 Creststone Place, San Diego, CA
Permit Application: 2016-010

Activity for Which Permit Is Requested

Take; Applicant desires to visit sites accessible by IAATTO registered tourist vessels and utilize a miniature (<1kg mass), multi-rotor (<20 cm rotor arm radius), remotely operated, battery powered (electric motor) UAS (Unmanned Aerial System) equipped with a small high resolution camera. The project will photo document Antarctic landscapes and the distribution and abundance of birds that occur at those sites. Bird species may include rockhopper, chinstrap, Adelie, and emperor penguins, and skuas, sheathbills, kelp gulls, and giant petrels, and birds may be roosting and/or breeding. "Take" would be unintended and unexpected incidental, brief, minor disturbance to 50 or less individual birds of each species (depending on the species, as noted in the application) during aerial vehicle flights at 25 to 60m in altitude, no further than 200m lateral distance away from the human operator, for no longer than 25 minutes in duration. The applicant has successfully deployed the equipment array over 75 times in various temperate, tropical and sub-polar environments, without wildlife disturbance.

Location

Various sites visited by IAATO registered vessels at Sub-Antarctic Islands, South Orkney Islands, South Shetland Islands, and the Antarctic Peninsula.

Dates

October 15, 2015–October 14, 2020
