SUPPLEMENTARY INFORMATION:

I. Discussion

The purpose of this ISG (ADAMS Accession No. ML15147A682) is to identify acute uranium intake values that will be acceptable to the staff for classifying acute worker exposure events as high or intermediate consequence events consistent with the general definition of the terms presented in § 70.61 of Title 10 of the *Code of Federal Regulations* (10 CFR). This guidance has been approved by the Division of Fuel Cycle Safety, Safeguards, and Environmental Review management (ADAMS Accession No. ML15147A680) and is available on the NRC's Web site as well as in ADAMS.

In a **Federal Register** notice published on September 17, 2014 (79 FR 55834), the NRC requested public comments on

the draft ISG. In response, Janet R. Schlueter on behalf of the Nuclear Energy Institute (NEI) provided comments by letter dated November 12, 2014 (ADAMS Accession No. ML14322A698). The NRC also received an anonymous comment (ADAMS Accession No. ML14345A747). The final ISG includes clarifications in response to these comments. The specific changes made in the final ISG were described in a letter to the Division of Fuel Cycle Safety, Safeguards, and Environmental Review management (ADAMS Accession No. ML15147A683).

II. Backfitting

The NRC is issuing interim guidance for the NRC staff regarding acute uranium intake values for classifying acute worker exposure events. Issuance of the ISG does not constitute backfitting as defined in 10 CFR 70.76 (the Backfit Rule). The NRC's position is based upon the following considerations.

1. *The ISG positions do not constitute backfitting, inasmuch as the ISG is internal guidance to NRC staff.*

The ISG provides interim guidance to the staff on how to review an application for NRC regulatory approval in the form of licensing. Changes in internal staff guidance are not matters for which applicants or licensees are protected under 10 CFR 70.76.

2. *The Backfit Rule does not protect current or future applicants.*

Applicants and potential applicants are not, with certain exceptions, protected by the Backfit Rule. This is because the Backfit Rule was not intended to apply to every NRC action that substantially changes the expectations of current and future applicants.

III. Congressional Review Act

This action is a rule as defined in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

Dated at Rockville, Maryland, this 17th day of September, 2015.

For the Nuclear Regulatory Commission.

Robert Johnson,

*Branch Chief, Fuel Manufacturing Branch
Division of Fuel Cycle Safety, Safeguards,
and Environmental Review Office of Nuclear
Material Safety and Safeguards.*

Benson, or sent via electronic mail to Cyrus.Benson@opm.gov or faxed to (202) 606-0910.

SUPPLEMENTARY INFORMATION:

The Office of Management and Budget is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submissions of responses.

RI 30–9, Reinstatement of Disability Annuity Previously Terminated Because of Restoration to Earning Capacity informs disability annuitants of their right to request restoration under title 5, U.S.C. Sections 8337 and 8455. It also specifies the conditions to be met and the documentation required for a person to request reinstatement.
