

Expiration Date 01/31/2017). This Revision includes new requests for approval to: (1) Replace “Hepatitis C virus, past or present” and “Hepatitis C, acute” with “Hepatitis C” on the List of Nationally Notifiable Conditions, (2) replace all listed Arboviral conditions with an inclusive category, “Arboviral Diseases” on the List of Nationally Notifiable Conditions, (3) receive case notification data for Hantavirus infection, non-Hantavirus Pulmonary Syndrome, (4) receive case notification data for Acute Flaccid Myelitis should it become nationally notifiable, (5)

receive case notification data for Amebic Encephalitis should it become nationally notifiable, (6) receive new laboratory and vaccine data elements for all conditions, and (7) receive new disease-specific data elements for Mumps, Pertussis, Varicella, Arboviral Diseases, and Sexually Transmitted Diseases (STD).

Although this Revision includes case notifications that were not part of the last NNDSS Revision, the estimate of the average burden per response based on the burden tables from all of the consolidated applications has not

changed. The burden on the states and cities is estimated to be 10 hours per response and the burden on the territories is estimated to be 5 hours per response. The addition of new vaccine, laboratory, and disease-specific data elements do not add any additional burden because the states, territories, and cities already collect those data elements. There will be no increase in burden for the states, territories, and cities to send those data elements to CDC. The estimated annual burden is 28,340 hours.

*Estimated Annualized Burden Hours*

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Avg. burden per response (in hrs.)
States .....	Weekly and Annual .....	50	52	10
Territories .....	Weekly and Annual .....	5	52	5
Cities .....	Weekly and Annual .....	2	52	10
