

33 CFR 117.5 which states it must open promptly on signal at any time, and requires constant attendance by with a drawtender. BNSF RR Bridge 38.3 provides 5 feet of vertical clearance in the closed-to-navigation position above high-water, and at the lowest tides up to 16 feet may be available.

This deviation allows the BNSF RR Bridge 38.3, at mile 1.5 crossing Ebey Slough, to remain in the closed-to-navigation position, and need not open for maritime traffic from 6 a.m. on October 11, 2015 through 11:59 p.m. on October 31, 2015. The bridge shall operate in accordance to 33 CFR part 117 subpart A at all other times.

Vessels able to pass through the bridge in the closed-to-navigation position may do so at any time. The bridge will be required to open, if needed, for vessels engaged in emergency response operations during this closure period, but any time lost to emergency openings will necessitate a time extension add to the approved dates. Waterway usage on this part of the Snohomish River and Ebey Slough includes vessels ranging from a commercial tug to small pleasure craft. No immediate alternate route for vessels to pass is available on this part of the river. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessels can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridges must return to their regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.
