

flexibility to determine how best to utilize network capacity as a funding resource to ensure both the establishment and self-sustainability of the network. Despite this flexibility, however, it is important to note that public safety entities will always have priority use of the NPSBN over any non-public safety user that gains access to, or use of, the network on a secondary basis.

Comment #29: One commenter suggested that the States should determine how much capacity/spectrum is made available within its borders under a covered leasing agreement—rather than FirstNet making the determination.

Response: FirstNet is the entity created by the Act to ensure the establishment of the NPSBN and is also the sole licensee of the 700 MHz D block spectrum and the existing public safety broadband spectrum.³⁴ Thus, FirstNet is the sole entity responsible for determining how to allocate the spectrum under a covered leasing agreement.

Comment #30: One commenter cautioned FirstNet to ensure there is not an undue expectation by the covered leasing agreement lessee that its lease of the spectrum supersedes public safety's access to, and use of, that spectrum as a priority in all cases, and at all times.

Response: FirstNet acknowledges the comment and reiterates that its primary mission is to ensure the establishment of a nationwide, interoperable network for public safety. Accordingly, public safety will always have priority use of the NPSBN over any non-public safety user that gains access to, or use of, the network on a secondary basis through a covered leasing agreement.

Comment #31: One commenter recommended that FirstNet interpret 47 U.S.C. § 1428(a)(3) to only apply to the RAN hardware in States that choose to participate in the NPSBN as proposed by FirstNet.

Response: FirstNet interprets the phrase “constructed or otherwise owned by [FirstNet]” under 47 U.S.C. 1428(a)(3) as meaning that FirstNet ordered or required the construction of such equipment or infrastructure, paid for the construction, owns the equipment, or does not own the equipment, but, through a contract, has the right to sublease the equipment or infrastructure. Thus, unless the RAN hardware in any State falls within the criteria above, FirstNet would not have the authority to assess and collect a fee for use of such infrastructure or equipment.
