[EPA–R09–OAR–2014–0256; FRL–9935–66–Region 9]

Approval and Promulgation of Implementation Plans; Arizona; Phased Discontinuation of Stage II Vapor Recovery Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of direct final rule.

SUMMARY: Due to the receipt of adverse comments, the Environmental Protection Agency (EPA) is withdrawing the September 2, 2015 direct final rule that approves a state implementation plan (SIP) revision related to the removal of “Stage II” vapor recovery equipment at gasoline dispensing facilities in the Phoenix-Mesa area. The

EPA will address the comments in a subsequent final action based upon the proposed rulemaking action, also published on September 2, 2105. The EPA will not institute a second comment period on this action.
DATES: The direct final rule published at 80 FR 53001 on September 2, 2015 is withdrawn, effective October 27, 2015.
FOR FURTHER INFORMATION CONTACT: Jeffrey Buss, Air Planning Office (AIR–2), U.S. Environmental Protection Agency, Region IX, 75 Hawthorne, San Francisco, California 94105; (415) 947–4152; *buss.jeffrey@epa.gov*.
SUPPLEMENTARY INFORMATION: On September 2, 2015 (80 FR 53001), the EPA published a direct final rule approving a SIP revision submitted by the Arizona Department of Environmental Quality (ADEQ). The revision provides for the phased removal of Stage II vapor recovery equipment at gasoline dispensing facilities in the Phoenix-Mesa area. Specifically, the revision eliminates the requirement to install and operate such equipment at new gasoline dispensing facilities, and provides for the phased

removal of such equipment at existing gasoline dispensing facilities from October 2016 through September 2018. In the direct final rule, the EPA stated that if adverse comments were received by October 2, 2015, the EPA would publish a timely withdrawal of the direct final rule and address the comments in a subsequent final rule. The EPA received adverse comments and is therefore withdrawing the direct final rule. The EPA will address these comments in a separate final action based on the proposed action also published on September 2, 2015 (80 FR 53086). The EPA will not open a second comment period for this action.

Outer Continental Shelf Air Regulations Consistency Update for Maryland

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking direct final action to approve an update to a portion of the Outer Continental Shelf (OCS) Air Regulations for Maryland. Requirements applying to OCS sources located within 25 miles of States' seaward boundaries must be updated periodically to remain consistent with the requirements of the corresponding onshore area (COA), as mandated by the Clean Air Act, as amended in 1990 (CAA or the Act). The portion of the OCS air regulations that is being updated pertains to the requirements for OCS sources for which Maryland is the designated COA. The intended effect of approving the OCS requirements for the Maryland Department of the Environment is to regulate emissions from OCS sources in accordance with the requirements onshore.

DATES: This rule is effective on December 28, 2015 without further notice, unless EPA receives adverse written comment by November 27, 2015. If EPA receives such comments, it will publish a timely withdrawal of the direct final rule in the **Federal Register** and inform the public that the rule will not take effect. The incorporation by reference of certain publications listed in the rule is approved by the Director of the Federal Register as of December 28, 2015.

SUPPLEMENTARY INFORMATION:

I. Background

On September 4, 1992, EPA promulgated 40 CFR part 55 which established requirements to control air pollution from OCS sources in order to attain and maintain Federal and state ambient air quality standards and to comply with the provisions of part C of title I of the CAA. Forty CFR part 55 applies to all OCS sources offshore of the states except those locations in the Gulf of Mexico west of 87.5 degrees longitude. Section 328 of the CAA requires that for such source locations within 25 miles of a state's seaward boundary, the requirements shall be the same as would be applicable if the source were located in the COA. Because the OCS requirements are based on onshore requirements, and onshore requirements may change, section 328(a)(1) requires that EPA update the OCS requirements as necessary to maintain consistency with onshore requirements.

Pursuant to 40 CFR 55.12 of the OCS rule, consistency reviews will occur: (1) At least annually; (2) upon receipt of a Notice of Intent under 40 CFR 55.4; or (3) when a state or local agency submits a rule to EPA to be considered for incorporation by reference in 40 CFR part 55. This proposed action is being taken in response to requirements submitted by Maryland. Section 328(a) of the Act requires that EPA establish requirements to control air pollution from OCS sources located within 25 miles of states' seaward boundaries that are the same as onshore requirements. To comply with this statutory mandate, EPA must incorporate applicable onshore rules into 40 CFR part 55 as they exist onshore. This limits EPA's flexibility in deciding which requirements will be incorporated into 40 CFR part 55 and prevents EPA from making substantive changes to the requirements it incorporates. As a result, EPA may be incorporating rules into 40 CFR part 55 that do not conform to all of EPA's state implementation
