

Subcommittee's responsibilities are issues that pertain solely to the quality and interpretation of scientific experiments and data in support of solar system exploration.

- *Planetary Science Subcommittee (PSS)*—Planetary Science Subcommittee is a standing subcommittee of the NAC Science Committee supporting the advisory needs of the NASA Administrator, the Science Mission Directorate (SMD), SMD's Planetary Science Division (PSD), and other NASA Mission Directorates as required. The scope of the PSS includes all aspects of planetary science, scientific exploration of the Moon and Mars, the robotic exploration of the solar system, astrobiology, exoplanet research, space- and ground-based research, technology development, planning, and training required to support these science areas. In addition to scientific research, the scope encompasses considerations of the development of near-term enabling technologies, systems, and computing and information management capabilities, as well as developments with the potential to provide long-term improvements in future operational systems. Responsibility for biological planetary protection is outside the purview of the PSS and resides with the Planetary Protection Subcommittee (PPS).
