II. Discussion

The NRC is issuing for public comment the draft plant-specific Supplement 56 to the GEIS for license renewal of nuclear plants, NUREG-1437, regarding the renewal of operating license, NPF-43 for an additional 20 years of operation for Fermi 2. Supplement 56 to the GEIS includes the preliminary analysis that evaluates the environmental impacts of the proposed action and alternatives to the proposed action. The NRC’s preliminary recommendation is that the adverse environmental impacts of license renewal for Fermi 2 are not great enough to deny the option of license renewal for energy-planning decisionmakers.

III. Public Meetings

The NRC staff will hold a public meeting prior to the close of the public comment period to present an overview of the draft plant-specific supplement to the GEIS and to accept public comment on the document. The meeting will be held at the Monroe County Community College, La-Z-Boy-Center 1555 S. Raisinville Road, Monroe, Michigan on Wednesday, December 2, 2015. There will be a registration period from 6:30 p.m. until 7:00 p.m. The meeting will start at 7:00 p.m. and continue until 9:00 p.m., as necessary. The meeting will be transcribed and will include: (1) A presentation of the contents of the draft plant-specific supplement to the GEIS; and (2) the opportunity for interested government agencies, organizations, and individuals to provide comments on the draft report. To be considered in the final supplement to the GEIS, comments must be provided either at the transcribed public meeting or submitted in writing by the comment deadline identified in the **DATES** section of this notice. Persons may pre-register to attend or present oral comments at the meeting by contacting Ms. Elaine Keegan, the NRC project manager, at 1-800-368-5642, extension 8517, or by

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Director of the Office of Nuclear Reactor Regulation, has issued a revision to a Director's Decision (DD) dated August 21, 2015 (ADAMS Accession No. 15175A465), with regard to a petition dated October 20, 2011 (ADAMS Accession No. ML11293A116), filed by the petitioners. The petition was supplemented on November 2, 2011 (ADAMS Accession No. ML11308A027) and December 15, 2011 (ADAMS Accession No. ML12060A197). The petition concerns the operation of the North Anna Power Station, Units 1 and 2 (North Anna 1 and 2), by the Virginia Electric and Power Company (VEPCO or the licensee). The petition requested that the NRC suspend the operating licenses for North Anna 1 and 2, until the completion of a set of activities described in the petition. The petitioner also requested that a public meeting be held to discuss this matter in the Washington, DC area.

As the basis for the October 20, 2011, request, the petitioner raised several concerns, of which 12 were accepted for review by the NRC staff by letter dated March 16, 2012 (ADAMS Accession No. ML12060A090). These are summarized as follows:

(1) Prior to the approval of restart for North Anna 1 and 2, after the earthquake of August 23, 2011, VEPCO should be required to obtain a license amendment from the NRC that reanalyzes and reevaluates the plant's design basis for earthquakes and for associated necessary retrofits.

(2) Prior to the approval of restart for North Anna 1 and 2, after the earthquake of August 23, 2011, the licensee should be required to ensure that North Anna 1 and 2, are subjected to thorough inspections of the same level and rigor.

(3) The licensee should be required to reanalyze and reevaluate the North Anna Independent Spent Fuel Storage Installation (ISFSI) due to damage caused by the earthquake of August 23, 2011, and ensure that no threat is posed to public health and safety by its operation.

(4) The licensee should ensure the reliability and accuracy of the seismic instrumentation at North Anna 1 and 2.

(5) The NRC staff made hasty decisions about the restart of North Anna 1 and 2, and gave priority to economic considerations. The long-term action plan was not even complete before the NRC staff gave authorization to restart.

(6) Regulatory commitments are an inadequate regulatory tool for ensuring that the critical long-term tasks identified in the NRC staff's confirmatory action letter dated November 11, 2011, are completed.

(7) The licensee needs to address the possibility of both boildown and rapid draindown events at the North Anna 1 and 2, spent fuel pool (SFP).

(8) The long-term storage of spent fuel in the SFP at North Anna 1 and 2, and at the North Anna ISFSI poses challenges to the public health and safety.

(9) "Hardened on-site storage" strategies for spent fuel should be used at North Anna 1 and 2.

(10) Concerns exist about the response of North Anna 1 and 2, to a prolonged station blackout.

(11) The current emergency evacuation plans for North Anna 1 and 2, need to be revised to reflect the possible need to evacuate a larger area than that identified in the current emergency planning zone.

(12) Concerns exist about damage to the structural integrity of the spent fuel pool structure at North Anna 1 and 2, as represented on pages 41 and 42 of the NRC staff's technical evaluation for the restart of North Anna 1 and 2, dated November 11, 2011.

On December 12, 2012 and February 2, 2012, the petitioners and the licensee

met with the NRC staff's petition review board (meeting transcripts under ADAMS Accession Nos. ML12033A025 and ML12047A240), regarding the petition. These meetings gave the petitioner and the licensee an opportunity to provide additional information and to clarify issues raised in the petition.

The NRC staff issued a partial DD on October 19, 2012 (ADAMS Accession No. ML12262A156). Twelve of the concerns were accepted for review by the NRC staff. As detailed in the partial DD, eight of these concerns were closed. The remaining four concerns accepted for review were identified as those that may take longer than the target timeframe for reaching a decision on a petition based on the fact they were undergoing NRC review as part of the agency's response to the Fukushima event in Japan.

Regarding the four remaining concerns, the NRC staff sent a copy of the proposed DD to the Petitioners and to the licensee for comment on April 17, 2015 (ADAMS Accession Nos. ML14311A616 and ML15061A133, respectively). The Petitioners provided comments in a response dated May 18, 2015 (ADAMS Accession No. ML15138A277) and the licensee provided comments in a response dated May 20, 2015 (ADAMS Accession No. ML15147A517). The comments and the NRC staff's response to them are included with this director's decision.

On August 21, 2015, the NRC issued a director's decision (ADAMS Accession No. ML15175A465). Subsequently, the NRC identified portions of the director's decision on the long-term storage of spent fuel in the SFP and ISFSI that required clarification. Accordingly, the decision's response to Concern 8 is revised to clarify the NRC's resolution of the concern.

The Director of the Office of Nuclear Reactor Regulation has determined that the request to suspend the operating licenses for North Anna 1 and 2, until the completion of a set of activities described in the petition, be partially granted and partially denied. The reasons for this decision are explained in the revised director's decision DD-15-09 pursuant to section 2.206 of title 10 of the *Code of Federal Regulations* (10 CFR) of the Commission's regulations.

The NRC will file a copy of the revised director's decision with the Secretary of the Commission for the Commission's review in accordance with 10 CFR 2.206. As provided for by this regulation, the director's decision will constitute the final action of the Commission 25 days after the date of the

decision, unless the Commission, on its own motion, institutes a review of the director's decision in that time.

Dated at Rockville, Maryland, this 30th day of October, 2015.

For the Nuclear Regulatory Commission.

William M. Dean,

Director, Office of Nuclear Reactor Regulation.
