

Total Estimated Number of Annual Burden Hours: 885.

Abstract: The Study of Enhanced College Advising in Upward Bound will test the effectiveness of providing Upward Bound projects with a professional development package and tools to provide semi-customized college advising to students participating in Upward Bound. Upward Bound projects were invited to volunteer for the demonstration, and approximately 200 projects that volunteered for the demonstration are included. Volunteer projects will be randomly assigned so that half receive the staff training, materials, tools, and resources in the first wave (spring 2015), and the other half will receive the staff training, materials, tools, and resources in the second wave (summer and fall 2016). The study will follow students who participate in both groups of projects as 11th graders in the 2014–2015 school year. The study will examine the impact of the demonstration on key outcomes including college application behavior, college acceptance and matriculation, and receipt of financial aid. The first of two ICRs for the study requested approval for the overall evaluation design, to collect 11th grade student rosters at each participating project and to administer the student baseline survey; the first ICR was approved on 8/8/2014. This is the second of two ICRs and requests approval for the remaining data collection activities, including a project survey, a follow-up student survey, and administrative records. Three reports will be produced, with one (expected 2017) reporting on the outcomes measures prior to high school graduation; a second (expected 2018) reporting on the results regarding actual college enrollment, college selectivity and use of Federal financial aid; and a third (expected 2020) reporting results regarding college persistence. The analyses will be both descriptive (distributions and means) and causal (using standard regression analyses to estimate impacts).

SUPPLEMENTARY INFORMATION:

Background: The SAB was established pursuant to the Environmental Research, Development, and Demonstration Authorization Act (ERDDAA), codified at 42 U.S.C. 4365, to provide independent scientific and technical advice to the Administrator on the technical basis for Agency positions and regulations. The SAB is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. The SAB will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies. Pursuant to FACA and EPA policy, notice is hereby given that the SAB Hydraulic Fracturing Research Advisory Panel will hold a public teleconference as part of the peer review of the EPA draft report, *Assessment of the Potential Impacts of Hydraulic Fracturing for Oil and Gas on Drinking Water Resources*, (May, 2015 External Review Draft, EPA/600/R–15/047).

The EPA's Office of Research and Development (ORD) has developed a draft assessment report concerning the relationship between hydraulic fracturing and drinking water in the United States. The purpose of the report, *Assessment of the Potential Impacts of Hydraulic Fracturing for Oil and Gas on Drinking Water Resources*, (May, 2015 External Review Draft, EPA/600/R–15/047), is to synthesize

available scientific literature and data to assess the potential for hydraulic fracturing for oil and gas to impact the quality or quantity of drinking water resources, and identify factors affecting the frequency or severity of any potential impacts. As noticed in 80 FR 32111–32113, the SAB Hydraulic Fracturing Research Advisory Panel held a face-to-face meeting on October 28–30, 2015, to conduct a peer review of the agency's draft report.

The purpose of the December 3, 2015, public teleconference is for the SAB Hydraulic Fracturing Research Advisory Panel to complete agenda items from the October 28–30, 2015 Panel meeting, namely to develop preliminary key points in response to charge questions on the agency's draft assessment.

Availability of Meeting Materials: Additional background on this SAB activity, the teleconference agenda, and other materials for the teleconference will be posted on the SAB Web site at <http://yosemite.epa.gov/sab/sabproduct.nsf/02ad90b136fc21ef85256eba00436459/f7a9db9abbac015785257e540052dd54?OpenDocument&Highlight=0,hydraulic,fracturing> in advance of the teleconference.

Throughout the Panel review process, there will be opportunities for the public to provide comments. For example, the public was invited to provide comments to the Docket on the draft EPA report and will have an opportunity to provide comments to the Docket on the SAB Panel's draft report, provide oral statements to the Panel during the Panel teleconferences and meeting, and provide comments in preparation for quality review of the SAB Panel's draft report by the Chartered SAB. Members of the public wishing to provide written comments may submit them to the EPA Docket electronically via www.regulations.gov, by email, by mail, by facsimile, or by hand delivery/courier.
