

Improvements. This alternative would also achieve the flood protection objectives of the Proposed Action, but would provide additional park amenities and neighborhood connections including a meandering bikeway and walkway, redesign of several pedestrian bridges, and more extensive landscaped features in East River Park. It would also include the reconstruction of Stuyvesant Cove Park. Key elements of this alternative include enhancing the pedestrian bridges at Delancey, East 6th, and East 10th Streets.

Alternatives will continue to be developed and refined during the EIS scoping process with input and consultation from local, state, and federal agencies that are either involved, interested, or cooperating in this environmental review process. These agencies include, but are not limited to, the New York City Departments of Transportation and Environmental Protection, the New York State Departments of Transportation and Environmental Conservation, and the U.S. Army Corps of Engineers along with input provided by non-agency stakeholders and the general public. It is expected that each of the alternatives selected for analysis in the Draft EIS will include the essential flood protection measures described above, in differing configurations, and with alternative approaches to upland drainage, providing park enhancements and neighborhood connectivity. Each alternative will also incorporate approaches for managing upland drainage, including infrastructure improvements that would address combined sanitary and stormwater drainage and maintain sewer system operations during a storm event.

Elements Common to Proposed Action Alternatives

Each of the Proposed Action alternatives would also require water main, sewer, and utility relocations and drainage improvements, an operations and maintenance plan, utility and lighting plans, connections to other flood protection structures (e.g., the protection systems at the Con Edison East River Generating Facility and the United States Department of Veterans Affairs Medical Center on East 23rd Street), and the repair and replacement of parkland and streets affected by construction. Construction activities may also require improvements to waterfront structures, temporary mooring facilities, and limited dredging along the East River to provide barge access during construction.

Need for the EIS

The Proposed Action described above has the potential to significantly affect the quality of the environment and an EIS will therefore be prepared in accordance with the requirements of NEPA, SEQRA, and CEQR. Responses to this notice will be used to (1) determine significant environmental issues; (2) assist in developing a range of alternatives to be considered; (3) identify issues that the EIS should address; and (4) identify agencies and other parties that will participate in the EIS process and the basis for their involvement.

Scoping

A joint NEPA/SEQRA/CEQR public scoping meeting on the Draft Scope of Work to prepare the Draft EIS will be held on December 3, 2015 at 7:00 p.m. at Bard High School Early College, 525 East Houston Street, New York, NY 10002. As noted above, the Draft Scope of Work is available online at: <http://www.nyc.gov/html/cdbg/html/home/home.shtml>. The public scoping meeting location will be accessible to the mobility-impaired. Interpreter services will be available for the hearing or visually impaired upon advance request. The EIS public scoping meeting will provide an opportunity for the public to learn more about the Proposed Action and provide input to the environmental review process. At the meeting, an overview of the Proposed Action and its alternatives will be presented and members of the public will be invited to comment on the Draft Scope of Work, including the methodologies to be used in developing the environmental analyses in the EIS. Written comments and testimony concerning the Draft Scope of Work will be accepted at this meeting. In accordance with 40 CFR 1501.7, affected Federal, State, and local agencies, any affected Indian tribes, and other interested parties will be sent a scoping notice. In accordance with 24 CFR 58.59, the scoping meeting will be preceded by a notice of public meeting published in the local news media at least 15 days before the hearing date.

Probable Environmental Effects

The EIS will evaluate potential effects from the Proposed Action on: Land Use, Zoning, and Public Policy; Socioeconomic Conditions; Environmental Justice; Open Space; Historic and Cultural Resources; Urban Design and Visual Resources; Natural Resources; Hazardous Materials; Water and Sewer Infrastructure; Transportation; Greenhouse Gases and

Climate Change; Public Health; Neighborhood Character; Construction; and Cumulative Effects.
