

facility near Sacramento International Airport.

The LPA includes a new bridge over the American River which will accommodate transit, bicycles, and pedestrians, and include connections to the American River Parkway on the north and south sides of the river. A design option of the bridge includes a wider bridge cross section to accommodate automobiles.

In addition to the alternatives described above, the Draft EIS will examine alignment design options to respond to new opportunities and conditions at the Sleep Train Arena site and at the Sacramento International Airport. Also, depending on funding availability from various federal and local sources, construction to Sacramento International Airport may require one or more phases. Phased implementation of the Green Line project or minimum operable segments will be considered as part of the Draft EIS.

Probable Effects

The purpose of the EIS is to study, in a public setting, the potential effects and benefits on the physical, human, and natural environment of implementing the proposed action. The permanent or long-term effects to be investigated during this study include effects to public parks and recreation lands (Section 4(f) Evaluation), traffic and transportation, land use and socioeconomic, visual character and aesthetics, noise and vibration, historical and archaeological resources, community effects, and natural resources. Temporary effects during construction may include effects to transportation and traffic, air quality, water quality, noise and vibration, natural resources, and encounters with hazardous materials and contaminated soils. Measures to avoid, minimize, and mitigate adverse impacts will also be identified and evaluated.

The analysis during the environmental review process will be undertaken in conformity with Federal environmental laws, regulations, and executive orders applicable to the proposed project. These requirements include, but are not limited to, the regulations of the Council on Environmental Quality implementing NEPA (40 CFR parts 1500 through 1508), FTA's NEPA implementing regulations and procedures (23 CFR part 771 and 23 U.S.C. 139), the air quality transportation conformity regulation of the U.S. Environmental Protection Agency (EPA) (40 CFR part 93), guidelines for disposal of dredged or fill material in section 404(b)(1) guidelines

of EPA (40 CFR part 230), Executive Orders 13609 and 11988 on floodplains, 11990 on wetlands, and 12898 on environmental justice, and regulations implementing section 106 of the National Historic Preservation Act (36 CFR part 800), section 7 of the Endangered Species Act (50 CFR part 402), and section 4(f) of the Department of Transportation Act (23 CFR 774).

FTA's Public and Agency Involvement Procedures

Regulations implementing NEPA and FTA guidance call for public involvement in the environmental review process. In accordance with these regulations and guidance, FTA and RT will: (1) Extend an invitation to other federal and non-federal agencies and Native American tribes that may have an interest in the proposed project to become participating agencies (any interested agency that does not receive an invitation can notify any of the contact persons listed earlier in this NOI); (2) provide an opportunity for involvement by participating agencies and the public to help define the purpose and need for a proposed project, as well as the range of alternatives for consideration in the EIS/EIR; and (3) establish a plan for coordinating public and agency participation in, and comment on, the environmental review process.

With the publication of this NOI, the scoping process and the public comment period for the project begins allowing the public to offer input on the scope of the EIS/EIR until Friday, January 15, 2016. Public comments will be received through those methods explained earlier in this NOI and will be incorporated into a Scoping Summary Report. The Scoping Summary Report will detail the scope of the EIS/EIR and the potential environmental effects that will be considered during the study period. After the completion of the Draft EIS/EIR, a public and agency review period will allow for input on the Draft EIS/EIR and these comments will be incorporated into the Final EIS/EIR for this project. In accordance with Section 1319 of the Moving Ahead for Progress in the 21st Century Act (MAP-21) (Pub. L. 112-114), *Accelerated Decision-making in Environmental Reviews*, FTA may consider the use of errata sheets attached to the Draft EIS/EIR in place of a in place of a traditional Final EIS/EIR and/or development a single environmental decision document that consists of a Final EIS/EIR and a Record of Decision (ROD), if certain conditions exist following the conclusion of the

public and agency review period for the project's Draft EIS/EIR.
