

longitudinal outcome/impact evaluation of the I-Corps Team Program using a quasi-experimental design to understand I-Corps impact on teams that go through the program and its impact on team members and academic culture.

The Office of Management and Budget has previously provided clearance for 3 data collection efforts associated with the I-Corps workshops targeting I-Corps grantees. These refer to: (1) A pre-course survey (2) a post-course survey and (3) a longitudinal survey of principal investigators in the program. This request builds on this previously approved information collection for NSF's Engineering IIP Program Monitoring Clearance (OMB Control No. 3145-0238).

This information collection request relates to (1) a proposed survey of principal investigators (PIs) in comparable Non-I-Corps NSF projects and (2) In-depth interviews with 10 I-Corps and 10 comparable non-I-Corps teams.

The survey will begin with an initial screening module to identify PIs who have received support for projects with commercial potential and who have desire to act on that potential but have not received an I-Corps grant. PIs with non-Corps NSF-funded projects awarded between 2009 and 2013 will be surveyed. PIs who reported active interest in commercial potential for their research projects will be asked to complete an additional module adapted from the I-Corps Longitudinal Data Collection already approved by OMB for I-Corps team members. The longitudinal survey collects information on project outputs and outcomes related to commercialization of research-based products. PIs not interested in the commercial potential of their research will stop the survey after completing the screening module.

In addition to the comparison between the I-Corps teams and a comparable group based on survey results, the study also includes in-depth interviews to gain an understanding of the influence of participation in the I-Corps program on PIs and other team members as well as to compare the impact of the I-Corps program on industry collaborations and other networking activities. Half of all in-depth interviews will be conducted over the phone while the other half will take place during site visits to the home institutions of the teams selected for the study.

Affected Public: Non-I-Corps Grant recipients of NSF Programs common in the background of I-Corps Teams Program PIs for the survey and 10 I-

Corps and 10 non-I-Corps research teams and networks.

Total Respondents: 9,000 (survey) 160 (in-depth interviews). Frequency: One-time collection.

Total responses: 7,200 (screeener module), 720 (modified longitudinal survey module) and 160 (in-depth interviews). Average Time per response: 5 minutes (screeener module), 15 minutes (modified longitudinal survey module) and 60 minutes (in-depth interview).

Estimated Total Burden Hours: 940 hours.

Dated: December 1, 2015.

Reports Clearance Officer, National Science Foundation.
