The FCC is responsible for the regulation of both authorized radio services and devices that can cause interference. The FCC, working in

conjunction with U.S. Customs and Border Protection (CBP), is responsible for ensuring that radio frequency devices imported into the United States are properly authorized. FCC Form 740 must be completed for each radio frequency device which is imported into the United States, and is used to keep non-compliant devices from being distributed to the general public, thereby reducing the potential for harmful interference being caused to authorized communications. FCC Form 740 is submitted to CBP electronically or, in a few cases, in paper format. The FCC Form 740 is not submitted to the Federal Communications Commission. FCC works with the CBP to resolve issues related to the importation of unauthorized radio frequency devices, and can issue fines for violation of its rules.

This information collection extension does not affect the ongoing rulemaking in ET Docket 15-170, which includes proposed rules that would modify or eliminate FCC Form 740.
