Title: The National Survey on the Use of Booster Seats.

OMB Control Number: 2127–0644.

Affected Public: Motorists in passenger vehicles at gas stations, fast food restaurants, and other types of sites frequented by children during the time in which the survey is conducted.

Form Number: NHTSA Form 1010.

Abstract: The National Survey of the Use of Booster Seats is being conducted to respond to the Section 14(i) of the

Transportation Recall Enhancement, Accountability, and Documentation (TREAD) Act of 2000. The act directs the Department of Transportation to reduce the deaths and injuries among children in the 4 to 8 year old age group that are caused by failure to use a booster seat by 25%. Conducting the National Survey of the Use of Booster Seats provides the Department with invaluable information on who is and is not using booster seats, helping the Department better direct its outreach programs to ensure that children are protected to the greatest degree possible when they ride in motor vehicles. The OMB approval for this survey is scheduled to expire on 1/31/16. NHTSA seeks an extension to this approval in order to obtain this important survey data, save more children and help to comply with the TREAD Act requirement.

Estimated Annual Burden: 320 hours.

Estimated Number of Respondents:

Approximately 4,800 adult motorists in passenger vehicles at gas stations, fast food restaurants, and other types of sites frequented by children during the time in which the survey is conducted.

Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.
