#### STORAGE:

Records in this system are maintained as hard-copy documents and on electronic media.

## RETRIEVABILITY:

Each OIG investigation is assigned a case number and all records relating to a particular investigation are filed and retrieved by that case number. Records may also be retrieved from the system by the name of an individual.

## SAFEGUARDS:

Electronic records are maintained on secure NASA servers and protected in accordance with all Federal standards and those established in NASA regulations at 14 CFR 1212.605. Approved security plans are in place for information systems containing the records in accordance with the Federal Information Security Management Act of 2002 (FISMA) and OMB Circular A-130, Management of Federal Information Resources. Only authorized personnel requiring information in the official discharge of their duties are authorized access to records through approved access or authentication methods. Access to electronic records is achieved only from workstations within the NASA Intranet or via a secure Virtual Private Network (VPN) connection that requires two-factor hardware token authentication or via employee PIV badge authentication from NASA-issued computers. Nonelectronic records are secured in locked rooms or files.

## **RETENTION AND DISPOSAL:**
