SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of June 11, 2010 (75 FR 33311), FDA announced the availability of a guidance for industry entitled “Bioequivalence Recommendations for Specific Products,” which explained the process

that would be used to make product-specific BE recommendations available to the public on FDA's Web site at <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>.

As described in that guidance, FDA adopted this process to develop and disseminate product-specific BE recommendations and to provide a meaningful opportunity for the public to consider and comment on those recommendations. This notice announces the availability of draft BE recommendations for paliperidone palmitate extended-release injectable suspension. FDA initially approved new drug application 022264 for INVEGA SUSTENNA (paliperidone palmitate) extended-release injectable suspension. There are no approved ANDAs for this product. In August 2011, we issued a draft guidance for industry on BE recommendations for paliperidone palmitate extended-release injectable suspension, which we subsequently revised in December 2013. We are now issuing a further revised draft guidance for industry on BE recommendations for generic paliperidone palmitate extended-release injectable suspension ("Draft Guidance on Paliperidone Palmitate").

In May 2013, Janssen Research and Development, LLC, manufacturer of the reference listed drug, INVEGA SUSTENNA, submitted a citizen petition requesting that FDA require that any ANDA referencing INVEGA SUSTENNA extended-release injectable suspension meet certain conditions related to demonstrating BE (Docket No. FDA-2013-P-0608). FDA is reviewing the issues raised in the petition. FDA will consider any comments on the Draft Guidance on Paliperidone Palmitate in responding to the petition.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the Agency's current thinking on the design of BE studies to support ANDAs for paliperidone palmitate extended-release injectable suspension. It does not create or confer any rights for or on any person and do not operate to bind FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.
