

where the machines were completed. CBP noted that though the developer unit and transfer unit were assembled in China, enough of the subassemblies and individual components (e.g. the transfer belt and photoconductor unit, among others) were from Japan, with the photoconductor being made of entirely Japanese parts. It also noted that though the developer unit would be assembled in China, two of the unit's key components were from Japan; and while the transfer unit would be partially assembled in China, the transfer belt was from Japan. CBP also noted that there were a large variety of adjustments that were made to the subassemblies in Japan, using advanced equipment and firmware. As a result, CBP held that the country of origin of the machines was Japan because the Japanese and foreign origin parts were substantially transformed into the machines through the product assembly that took place in Japan. See also HQ H020516, dated November 7, 2008 (holding that the country of origin of certain MFPs was Japan, using the same reasoning as HQ 562936 and HQ H025106, and also noting that the MFPs were designed and developed in Japan).

Based on the facts presented, we note that though the assembly of the bizhub MFP will take place in Japan and Thailand, there are also operations that contribute to this assembly which will take place in China. In situations like these, no one country imparts the dominant portion of the work conducted. Nonetheless, based upon the applicable legal standard, we determine that, the frame and subassemblies of the bizhub MFP that will be imported into Japan will be substantially transformed in Japan such that Japan will be the country of origin for purposes of U.S. Government procurement. In making this determination, we note that only four of the bizhub MFP's subassemblies (i.e. Subassemblies 1-4) will be assembled into the bizhub MFP's frame in Thailand, while the remaining seven subassemblies (i.e. Subassemblies 5-10, plus the MFP Board) will be assembled into, and permanently integrated within, the bizhub MFP in Japan. Further, we note that the MFP Board (the "brain" of the bizhub MFP) will be manufactured from all Japanese parts, will be integrated into the bizhub MFP in Japan, and accounts for a significant percentage of total subassemblies cost. Although many of the

individual subassemblies will be assembled outside of Japan, we note sufficient use of Japanese sub-components in producing these subassemblies, such as the fusing belt that will be used to make the Fusing Unit, and the OPC drums, developer, and electrostatic roller that will be used to make the Latent Image Unit. As a result, the Japanese subassemblies and sub-components collectively attribute a significant percentage of the total subassemblies cost. Moreover, though we note the importance of the subassemblies and sub-components from Thailand and China, these subassemblies and sub-components will be integrated into a product that was designed and developed in Japan, and will be operated by Japanese-developed software that will also be installed onto the bizhub MFP in Japan. See HQ H198875, dated June 5, 2012 (noting that a foreign HDD that was integrated into an MFP in Singapore and installed with Japanese software in Singapore contributed to the reason that the HDD was substantially transformed into the MFP in Singapore). In this case, K/M incurred significant resources in Japan by developing and designing the MFP product, and its proprietary software, in Japan. Finally, the assembly operations that occur in Japan will be sufficiently complex and meaningful. Through the product assembly, as well as the testing and adjustment operations, the individual subassemblies and sub-components of Japanese and foreign-origin will be subsumed into a new and distinct article of commerce that has a new name, character, and use. Therefore, under the totality of the circumstances, we find that the country of origin of the bizhub MFP will be Japan for purposes of U.S. Government procurement.

HOLDING:

Based on the facts provided, the country where the last substantial transformation will take places is Japan. As such, the bizhub MFPs will be considered products of Japan for purposes of U.S. Government procurement.

Notice of this final determination will be given in the **Federal Register**, as required by 19 CFR 177.29. Any party-at-interest other than the party which requested this final determination may request, pursuant to 19 CFR 177.31, that CBP reexamine the matter anew and issue a new final determination. Pursuant to 19 CFR 177.30, any party-at-

interest may, within 30 days of publication of the **Federal Register** Notice referenced above, seek judicial review of this final determination before the Court of International Trade.

Sincerely,
Myles B. Harmon,
*Acting Executive Director
