**SUPPLEMENTARY INFORMATION:**

*Title of Collection:* Nonprofit Research Activities Survey.

*OMB Approval Number:* 3145-New.

*Expiration Date:* Not applicable.

*Type of Request:* Intent to conduct a pilot test for an information collection.

*Abstract:* The nonprofit sector is one of four major sectors that perform and/or fund research and development (R&D) in the U.S. Historically, the National Science Foundation (NSF) has combined this sector's data with the business, government, and higher education sector data to estimate total national R&D expenditures via the annual *National Patterns of R&D Resources* report. The other three sectors are surveyed annually; however, it has been more than 18 years since NSF last collected R&D data from nonprofit organizations.

The primary objective of the new survey is to fill data gaps in the *National Patterns of R&D Resources* in such a way that it is compatible with data

collected on the business, government, and higher education sectors of the U.S. economy and appropriate for international comparisons. Since the last survey of research activity in the nonprofit sector occurred more than 18 years ago, and because of the more than 21% growth in IRS filings by nonprofits between 2001 and 2011, it is important that a new survey of nonprofit R&D be fielded to update current national estimates for the nonprofit sector.

The National Center for Science and Engineering Statistics (NCSES) plans to conduct a pilot of the new Nonprofit Research Activities Survey (NPRAS). NPRAS will collect R&D and other related data from U.S. nonprofit organizations. This survey will collect the following:

- Total amount spent on R&D activities within nonprofit organizations,
- Number of employees and R&D employees,
- Sources of funds for R&D expenditures,
- Expenditures by field of R&D,
- Total amount of R&D funding provided to others outside the nonprofit organization,
- Types of recipients receiving R&D funding, and
- Funding by field of R&D.

The process of developing the questionnaire involved several major steps. First, at NSF's request, in February 2014 the Committee on National Statistics convened a steering committee on Measuring R&D Expenditures in the U.S. Nonprofit Sector. Second, NCSES (through its contractor) conducted 23 interviews with representatives of nonprofit organizations. Third, an expert panel was convened in September 2014 for the
