

with the communications technologies for a period of six months.

We anticipate that the Coast Guard's contributions under the proposed CRADA will include the following:

(1) Develop the Demonstration Pilot Assessment Plan to meet the objectives of the CRADA with a diverse set of real-life mission scenarios.

(2) Provide the pilot demonstration range and range support in and around a Coast Guard Sector.

(3) Evaluate utility of a Coast Guard tower for installation of the LTE base station radios or identify an alternative site to deploy a mobile tower.

(4) Coordinate Pilot demonstration network connectivity to desired CG networks and systems and seek all spectra approvals.

(5) Collaborate with non-Federal partner to prepare demonstration documentation including equipment assessments, final report(s), and briefings.

We anticipate that the non-Federal participant's contributions under the proposed CRADA will include the following:

(1) Assist the R&D Center in the development and drafting of all CRADA documents, including the pilot demonstration assessment plan, equipment assessments, final report(s), and briefings.

(2) Provide and maintain the LTE Band 14 Network and MUOS communications equipment including radios, handsets, vehicle routers, and modems, to ensure the network is accessible.

(3) Secure, with R&D Center assistance, Special Temporary Authority (STA) to implement the Pilot using Band 14 spectrum.

(4) Provide technical support, training and maintenance throughout the period of performance to ensure maximum availability and utility of the networks.

The Coast Guard reserves the right to select for CRADA participants all, some, or no proposals submitted for this CRADA. The Coast Guard will provide no funding for reimbursement of proposal development costs. Proposals and any other material submitted in response to this notice will not be returned. Proposals submitted are expected to be unclassified and have no more than five single-sided pages (excluding cover page, DD 1494, JF-12, etc.). The Coast Guard will select proposals at its sole discretion on the basis of:

(1) How well they communicate an understanding of, and ability to meet, the proposed CRADA's goal; and

(2) How well they address the following criteria:

(a) Technical capability to support the non-Federal party contributions described; and

(b) Resources available for supporting the non-Federal party contributions described.

Currently, the Coast Guard is considering General Dynamics Mission Systems, Inc. for participation in this CRADA. This consideration is based on the fact that General Dynamics has demonstrated its technical ability as the developer, manufacturer, and integrator of LTE Band 14 Network equipment and MUOS Satcom technologies. However, we do not wish to exclude other viable participants from this or future similar CRADAs.

This is a technology assessment effort. The goal for the Coast Guard of this CRADA is to better understand the advantages, disadvantages, required technology enhancements, performance, costs, and other issues associated with Band 14 LTE broadband wireless communications and MUOS satellite communications. Special consideration will be given to small business firms/consortia, and preference will be given to business units located in the U.S. This notice is issued under the authority of 5 U.S.C. 552(a).

Dated: December 24, 2015.

Captain Dennis C. Evans, USCG,
*Commanding Officer, U.S. Coast Guard
Research and Development Center.*
